

5th International Workshop on New Photon-Detectors (PD18)

Tuesday 27 November 2018

Tuesday morning: Session 1 (Chair: N. Otte) (09:30-10:55)

time	[id] title	presenter
09:30	[71] Opening	
09:40	[70] Recent development of MPPC and Si detectors for HEP experiments	Mr YAMAMOTO, Koei
10:15	[5] High-Density Silicon Photomultipliers with Epitaxial Quenching Resistors at NDL	Prof. HAN, Dejun
10:35	[28] Development of High-density NIR sensitive Silicon photomultipliers at FBK	ACERBI, Fabio

Tuesday morning: Session 2 (Chair: N. Otte) (11:25-12:25)

time	[id] title	presenter
11:25	[25] Direct Measurement of Optical Cross-Talk in SiPMs Using Light Emission Microscopy	STROM, Derek
11:45	[18] Experimental SiPMs parameter characterization from avalanche triggering probabilities	GALLINA, Giacomo
12:05	[24] Characterization of SiPM Optical Crosstalk and its Resin Thickness Dependence	Mr NAKAMURA, Yuki
