

5th International Workshop on New Photon-Detectors (PD18)

Thursday 29 November 2018

Thursday morning: Session 9 (Chair: T. Iijima) (09:00-10:35)

time	[id] title	presenter
09:00	[74] Advanced vacuum photodetectors and their applications	KORPAR, Samo
09:35	[22] Performance of the Hyper-Kamiokande 20" PMT	Dr BRONNER, Christophe
09:55	[66] Mass Production of MCP-PMT for JUNO and Development of 20-inch MCP-PMT with TTS Improved	Dr REN, LING
10:15	[2] Fast-timing microchannel plate photodetectors: design, fabrication and characterization	XIE, Junqi

Thursday morning: Session 10 (Y. Nishimura) (11:05-12:05)

time	[id] title	presenter
11:05	[40] A detection unit designed for the study of the UHECRs from space	PREVOT, Guillaume
11:25	[14] Fast Charged Particle Detector with High Dynamic Range at Horizon-10T Cosmic Rays Detector System	BATYRKHANOV, Ayan
11:45	[33] STRAW - Strings for Absorption Length in Water	REA, Immacolata Carmen
