

Progress report

2018/11/02

Michitaka Inomoto

Tokyo University of Science

What I have done

I wanted to raise B-field to about 1mT.
So, I rewound a coil around the dark box.

To the next

I'm going to measure PMT's efficiency with the coil.

I want to know PMT's ϕ symmetry.

So, I'm going to measure PMT's efficiency on 5 positions, center, and its surroundings by 90 degrees while changing points LED's light.
