

Status update

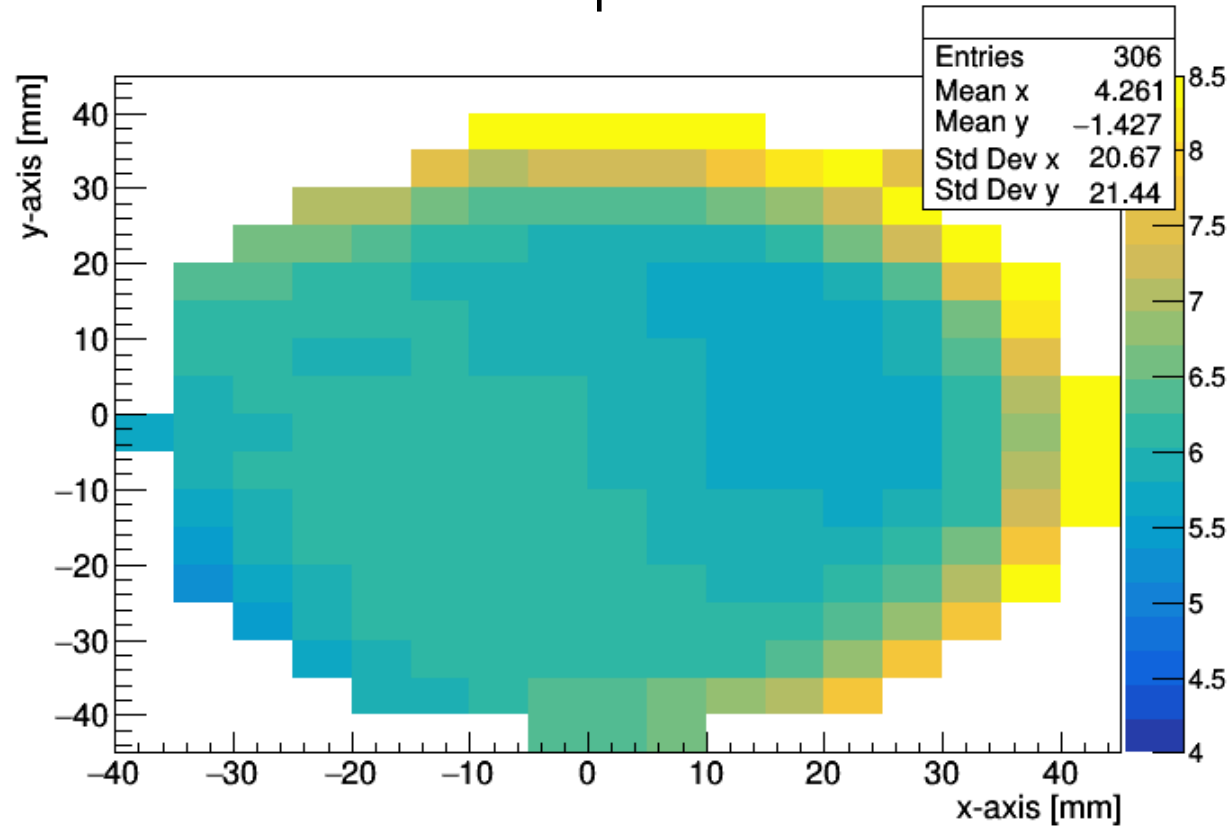

TUS Nao Izumi

08/09/2019

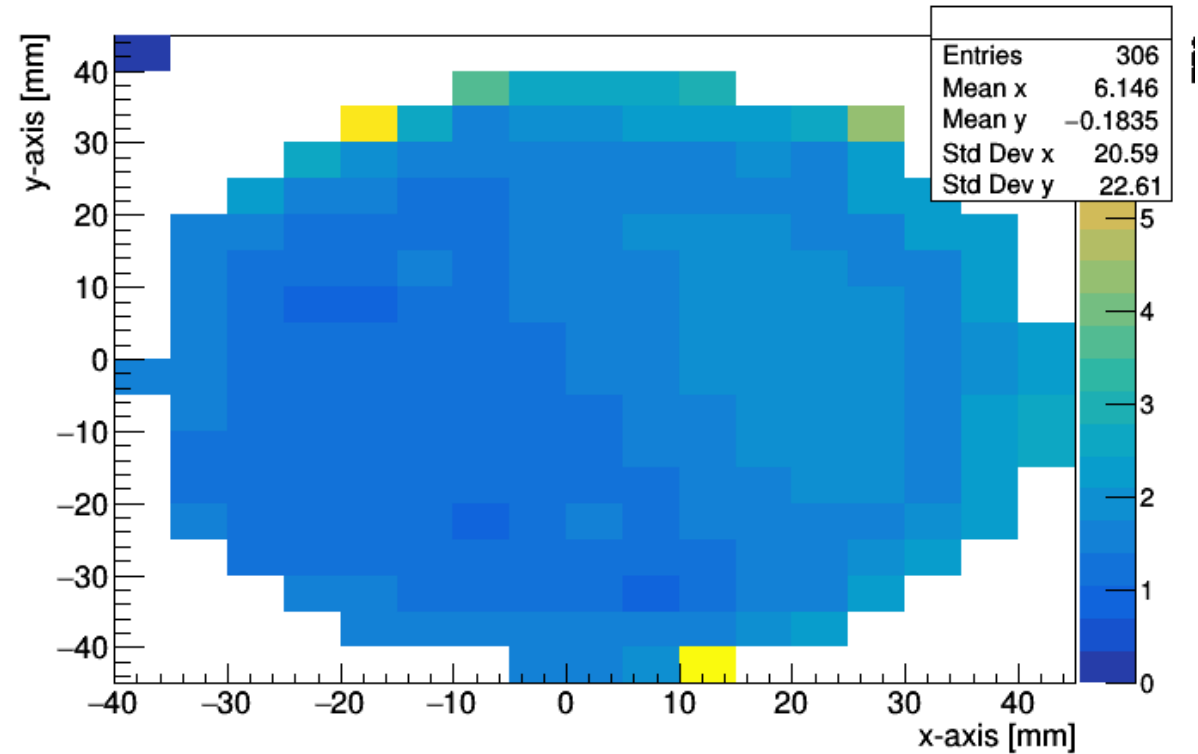

What's new

- The first position measurement with finer granularity has been done.
- The fit is failing in some histograms.

Time response

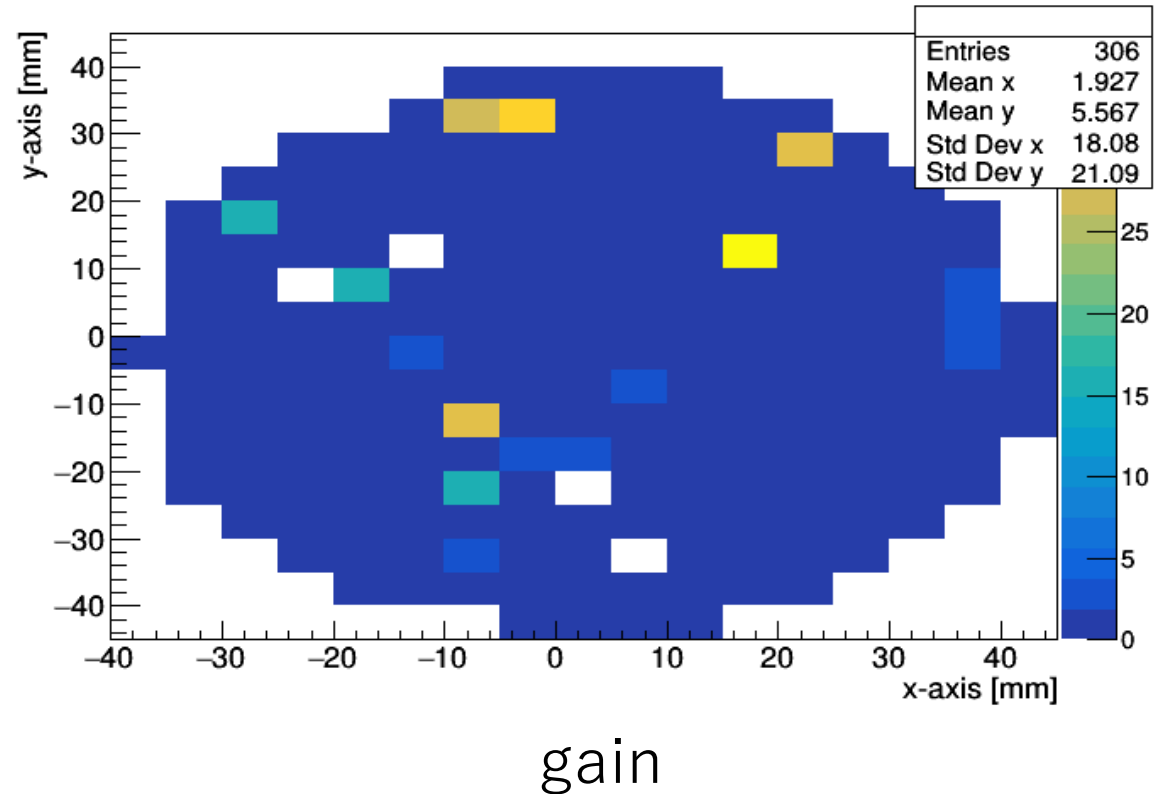

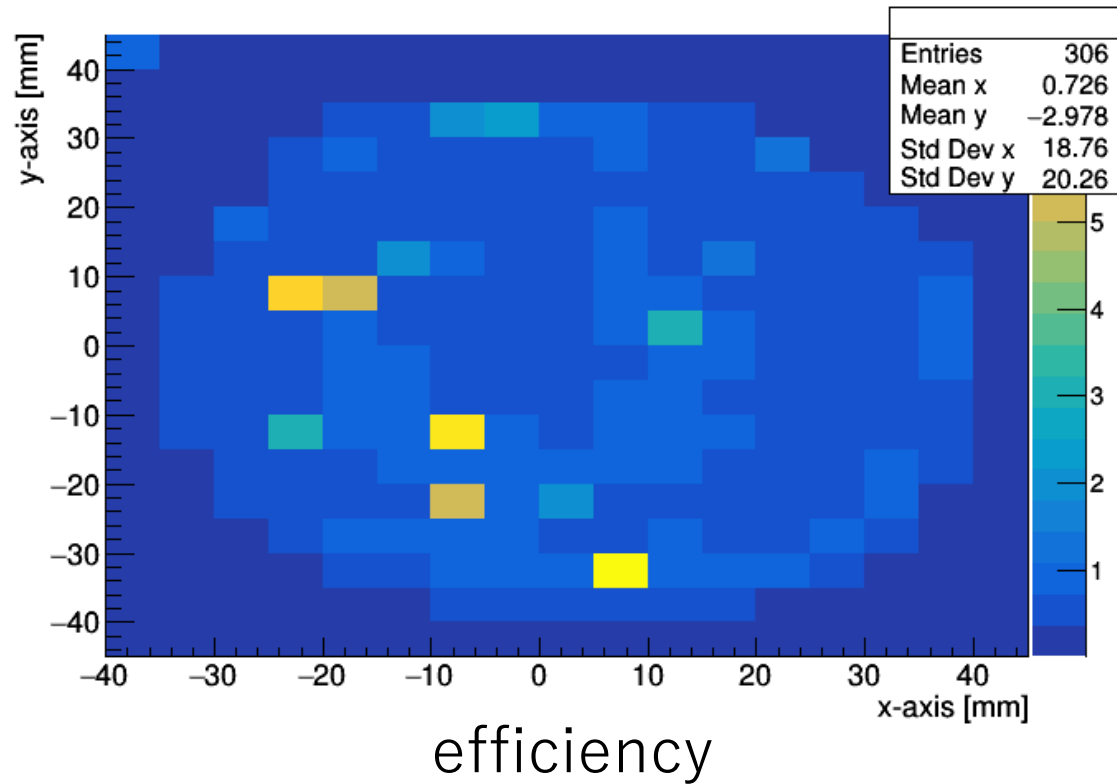

TT

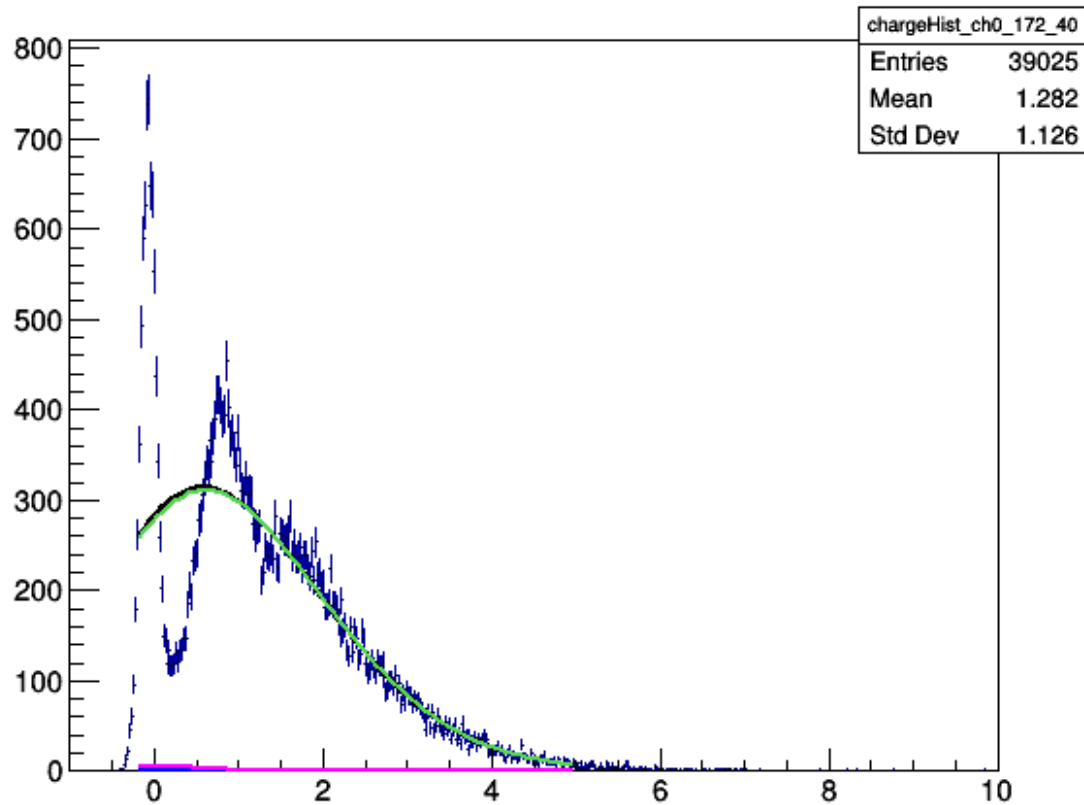

TTS

Efficiency and gain

There are some points with extremely high efficiency and gain.

Fit failure

The fit is failing in some histograms.

I'm planning to fix the fit by:

- fix some parameters → fit
- Release those parameters → fit again

Next...

- I am going to try fitting the histograms again.
- I will take other position measurements with another PMT/HV.
