

# Cosmic Cartography 2022: Exploring the Cosmic Web and Large-Scale Structure

## Wednesday 09 March 2022

**Day 3 Afternoon: Environments II - Lecture Hall (14:00-18:05)**

time	[id] title	presenter
14:00	[35] GOODS-ALMA: Optically dark ALMA galaxies shed light on a cluster in formation at $z = 3.5$	ZHOU, Luwenjia
14:20	[36] Thermal Instabilities and Shattering in the High-redshift Cosmic Web - A Source for Low-metallicity Strong HI Absorbers	MANDELKER, Nir
14:40	[37] HAmiltonian Monte carlo reconstruction of the Local Environment (Hamlet)	VALADE, Aurelien
15:00	[38] Beyond halo mass: Some clues on how the geometry and vorticity of gas flows shape galaxy mass assembly	LAIGLE, Clotilde
15:30	[39] Why does the cosmic web matter for low redshift galactic morphology?	PICHON, Christophe
16:00	Break	
16:15	[40] Pre-processing galaxies in protoclusters	HATCH, Nina
16:45	[41] MOONS at the VLT: current status and planning for galactic and extragalactic surveys	CIRASUOLO, Michele
17:15	[42] Galaxies, clusters, and superclusters: connectivity, collapse, and evolution	EINASTO, Maret
17:35	[43] TBD	TASCA, Linda
