Weak lensing and cosmic birefringence

Tuesday, 28 March 2023 14:20 (20 minutes)

Cosmic birefringence a newly reported signal from CMB and promising probe for new physics. In this talk, I am going to talk about weak lensing correction to Cosmic Birefringence signal. It will be important to use highly improved data by next generated CMB observations in the near future.

Presenter: NAOKAWA, Fumihiko

Session Classification: Afternoon session-1
