Much of our knowledge of DM (and DE) comes through **gravity**

... which was **quantum gravity** in the early universe

QG challenges the EFT paradigm for DM

Not all EFTs have consistent UV completion in QG
Naturalness ??

Quantum gravity:
navigator for exploring DM discovery space

The Team

**Yasunori
Nomura
(Berkeley)**

**Ryo
Saito
(Yamaguchi)**

**Satoshi
Shirai
(IPMU)**

**Masahito
Yamazaki
(IPMU)**

Some recent highlights

“de Sitter Space Is Sometimes Not Empty”

V. Balasubramanian, **Y. Nomura**, T. Ugajin

“Can we explain cosmic birefringence without a light field?”

Y. Nakai, R. Namba, **I. Obata**, Y. Qiu, **R. Saito**

“Ostrogradsky mode in scalar–tensor theories with higher-order derivative couplings to matter”

A. Naruko, R. Saito, N. Tanahashi, **R. Saito**

“Constraining Neutrino-Dark Matter Interactions with Milky Way Dwarf”

S. Heston, **S. Horigome**, **S. Shirai**

“Revisiting Metastable Cosmic String Breaking”

A. Chitose, M. Ibe, Y. Nakayama, **S. Shirai**, K. Watanabe

“Global symmetries in ensemble averages in holography”

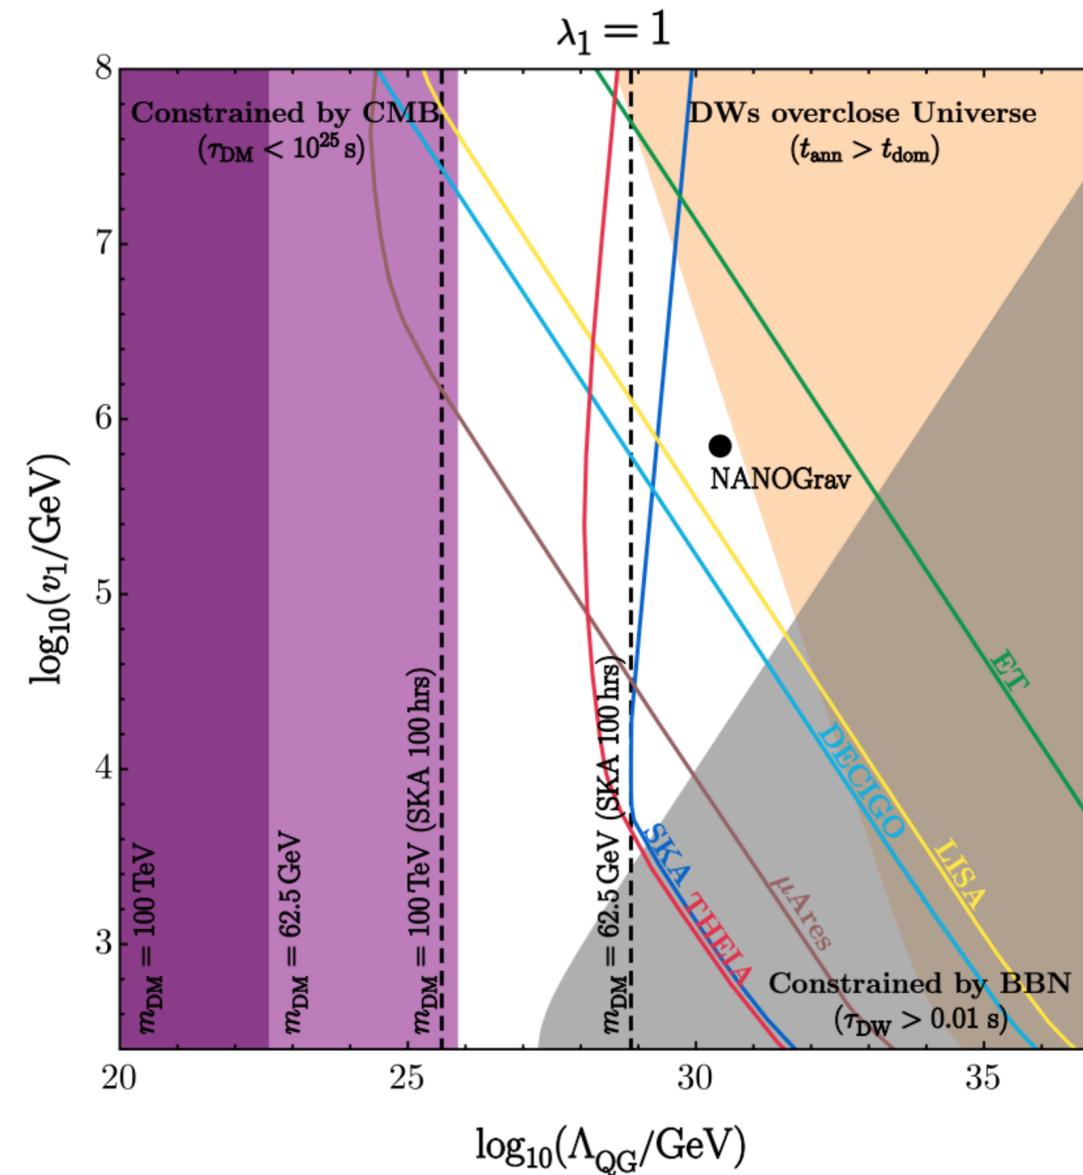

M. Ashwinkumar, J. Leedom, **M. Yamazaki**

“Quantum Gravity Effects on Dark Matter and Gravitational Waves”

Stephen F. King, Rishav Roshan, Xin Wang, Graham White + **MY** (2308.03724 [hep-ph])

“Quantum Gravity Effects on Fermionic Dark Matter and Gravitational Waves”

Stephen F. King, Rishav Roshan, Xin Wang, Graham White + **MY** (arXiv:2311.12487 [hep-ph])

“Cosmological Hints of String Theory Axions”

D. Kondo, **H. Murayama**, R. Okabe,
S. Saito, Y. Watanabe + MY (in progress)

Q: Any observational signatures
of string theory??

Q: Any observational signatures
of string theory??

Q: Evidence Already?????

MANY axions in String Theory

Who ordered muons?

Isidor Rabi

Who ordered axions?

Many ALP?

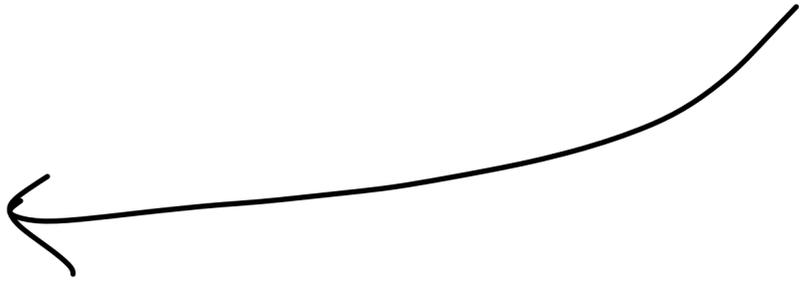

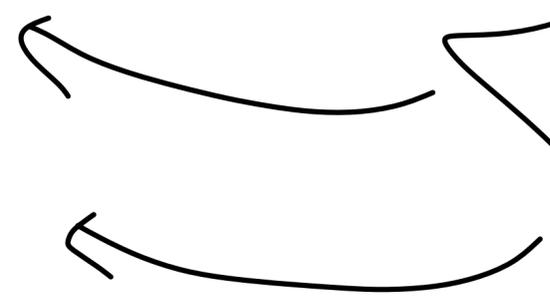

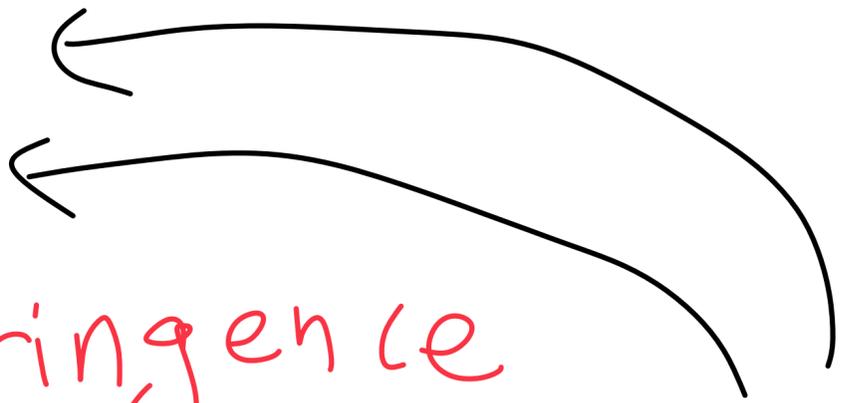

ultra-light

- H_0 tension
- S_8 tension
- cosmic birefringence

- Dark Energy
- Dark Matter

- Baryogenesis
- Inflation

AXION
(ALP)

String Landscape

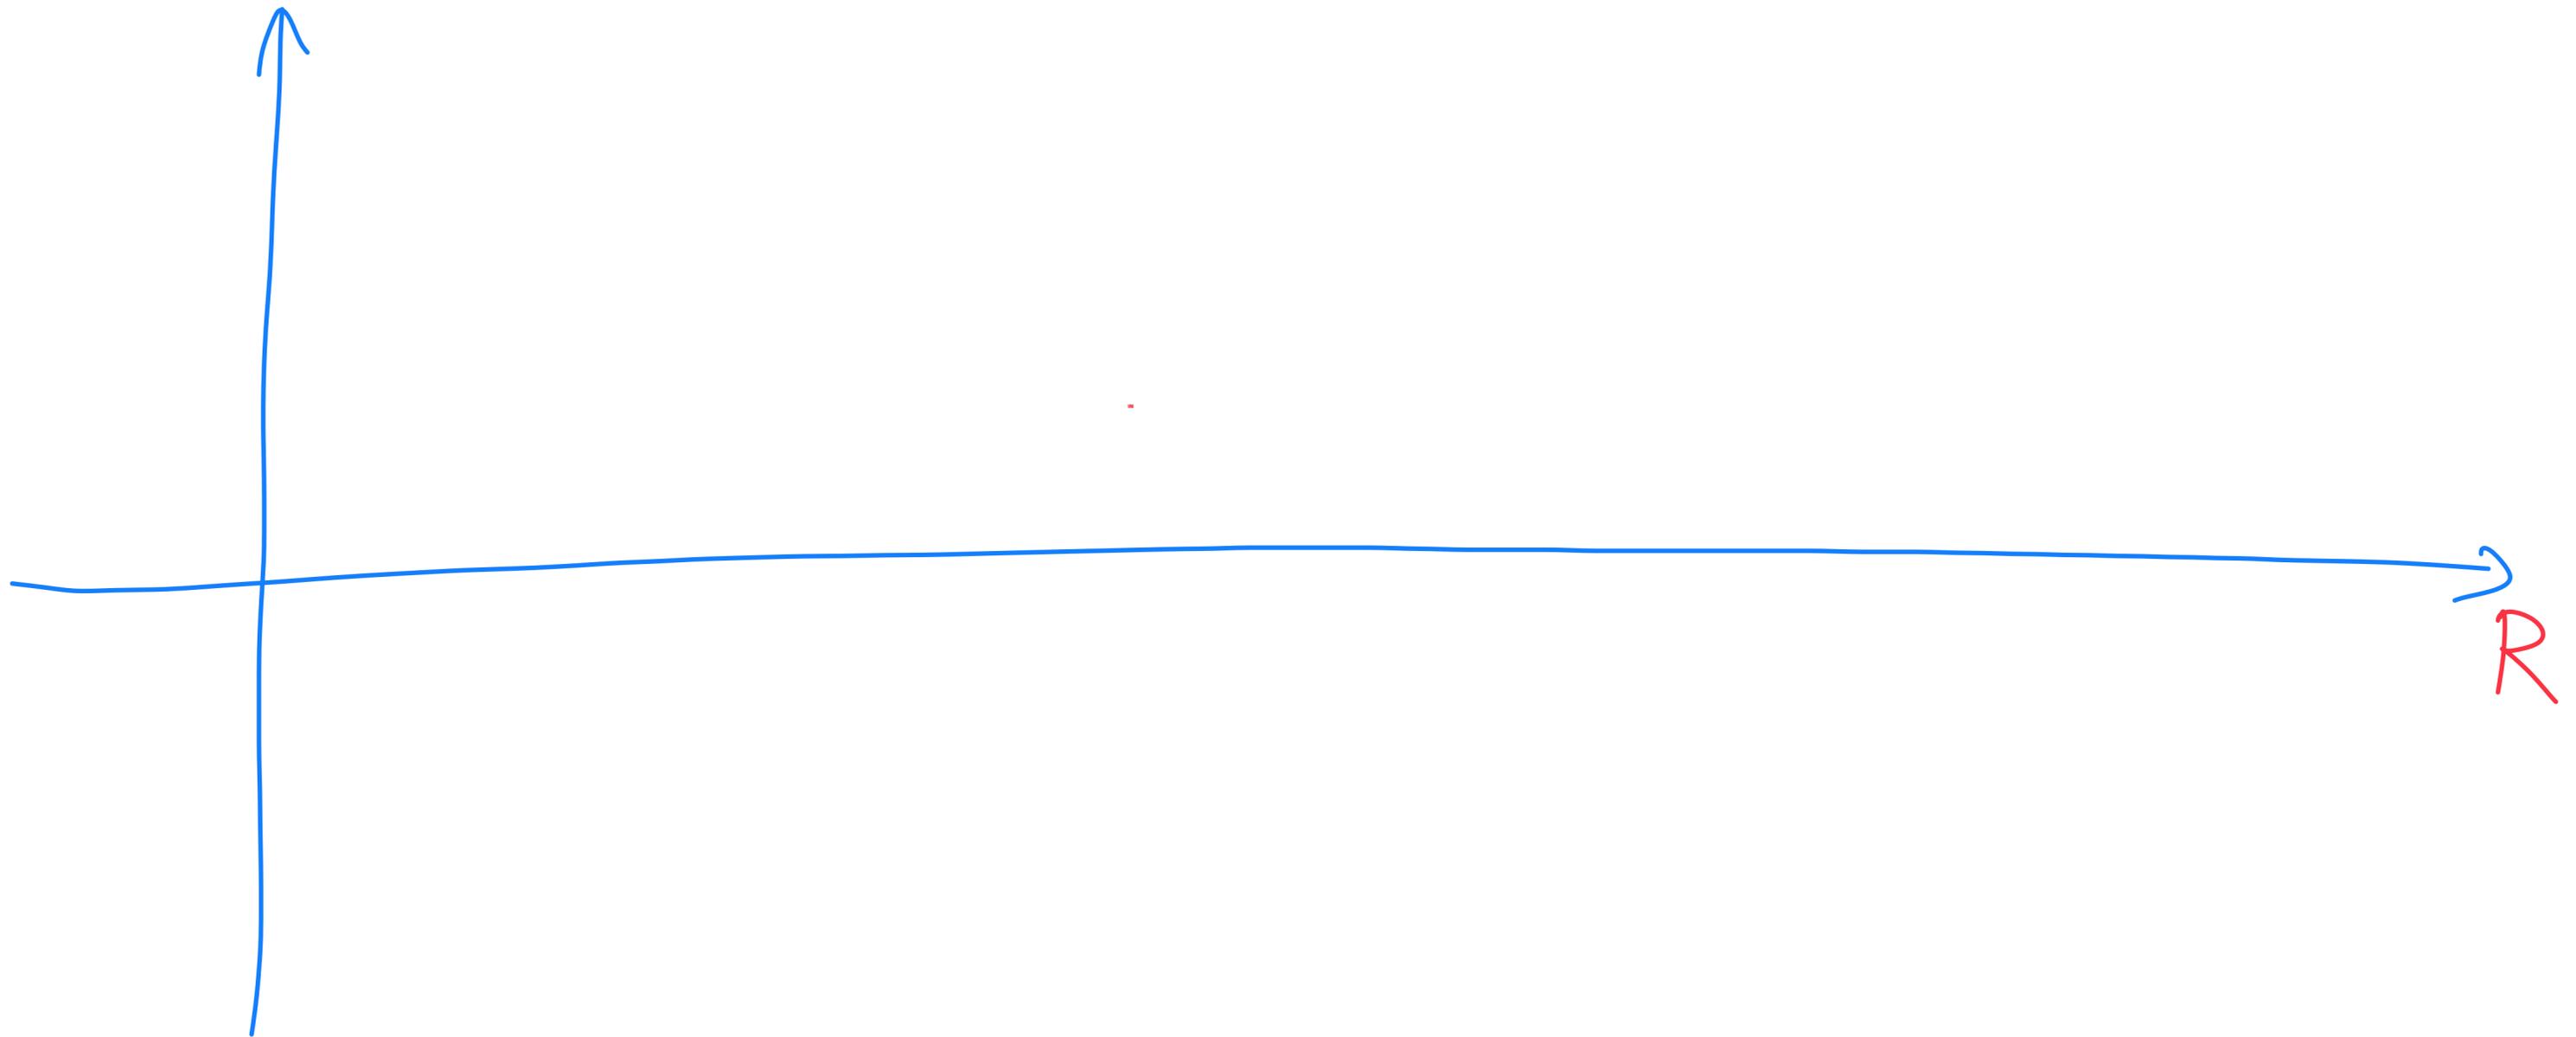

Land Scape of SM

[Arkani-Hamed, Dubovsky, Nicolis, Villard '07]

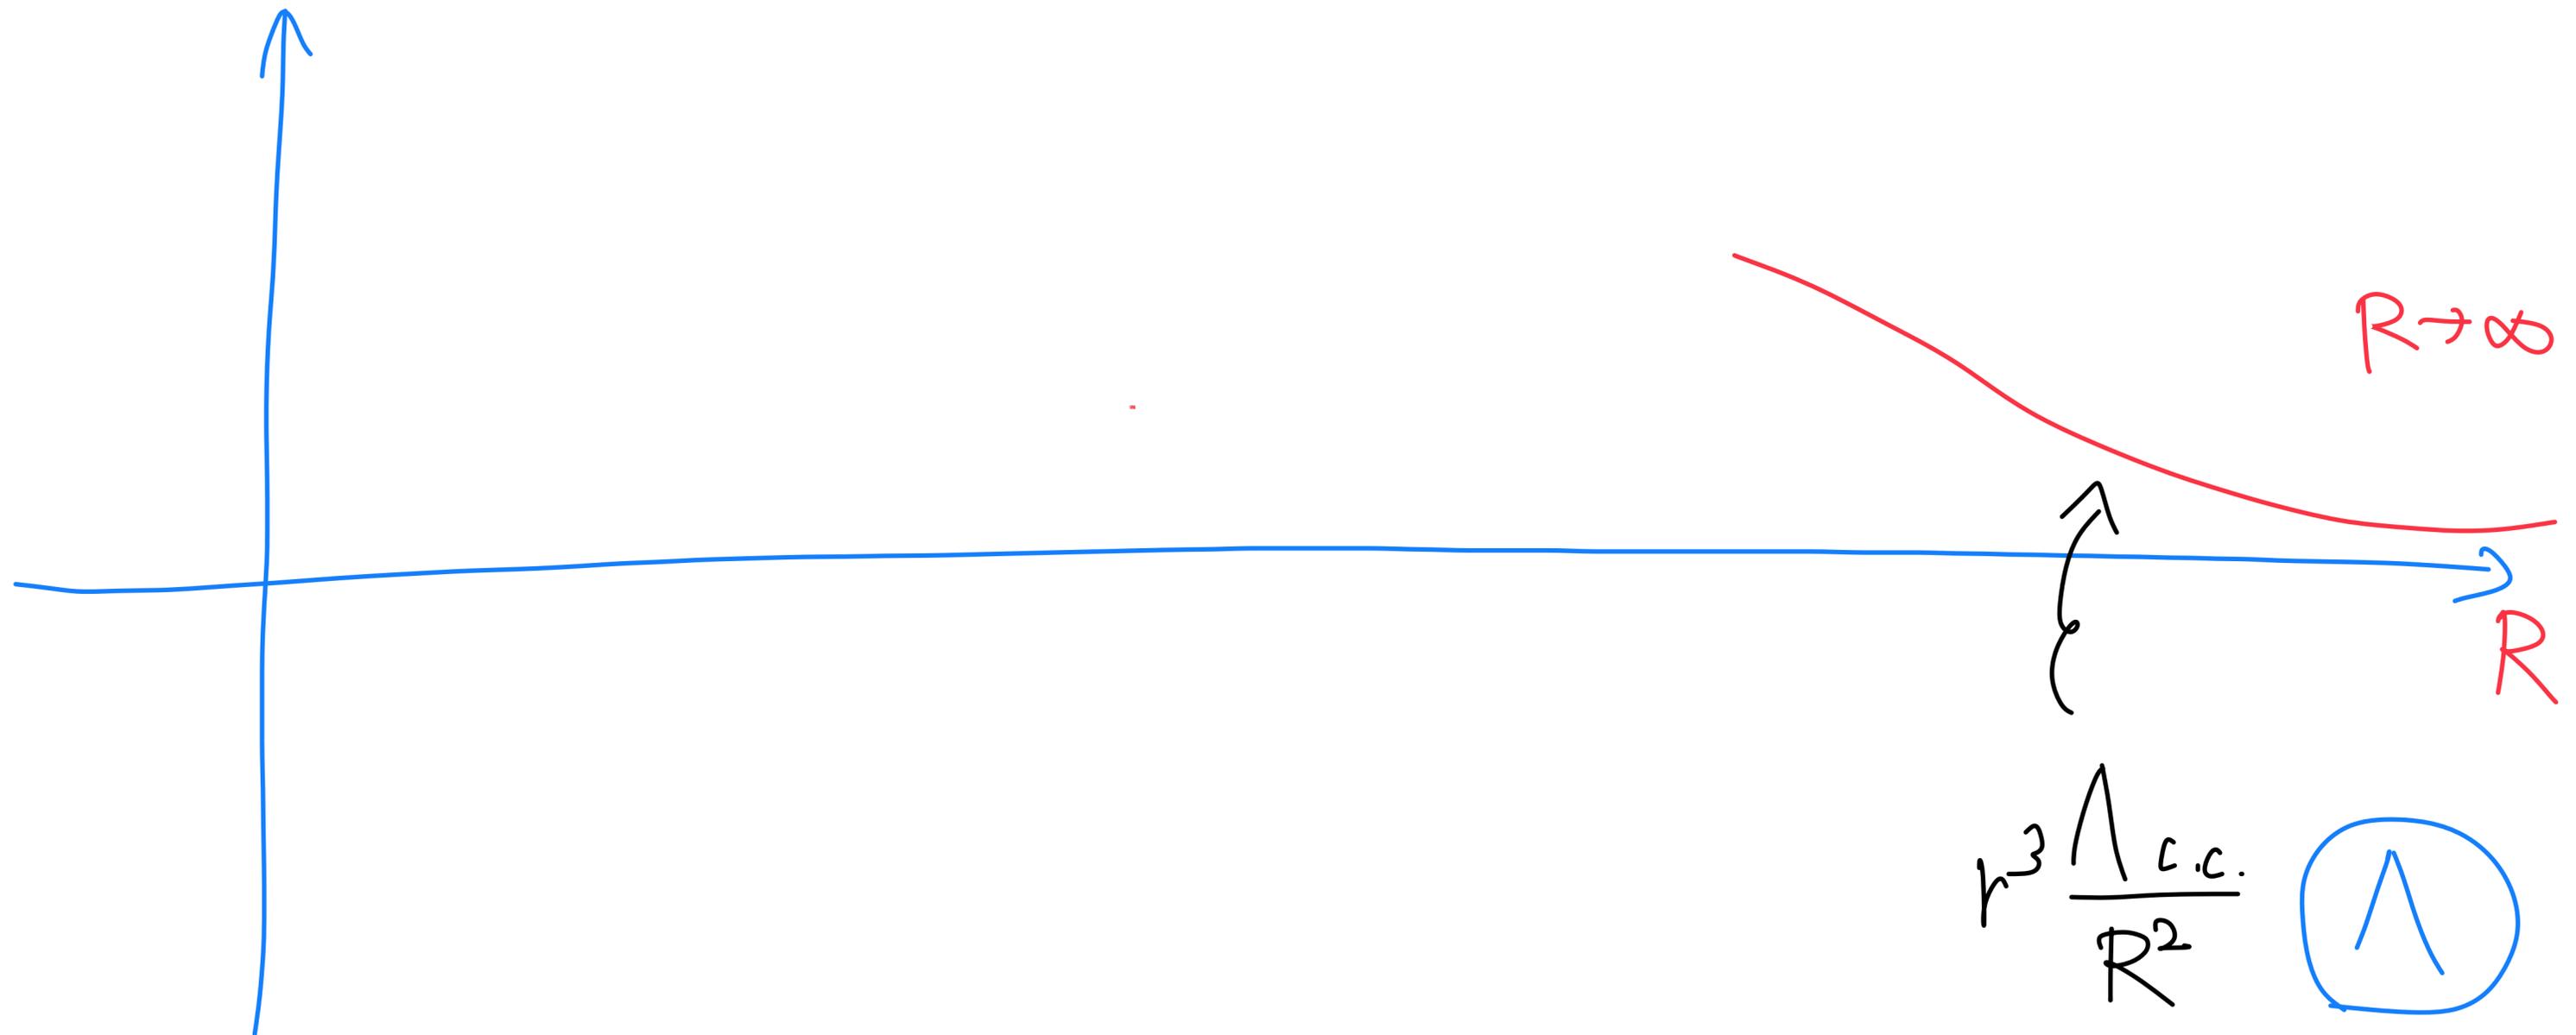

Consider SM on S^1 with radius R :

non-trivial potential from Casimir energy

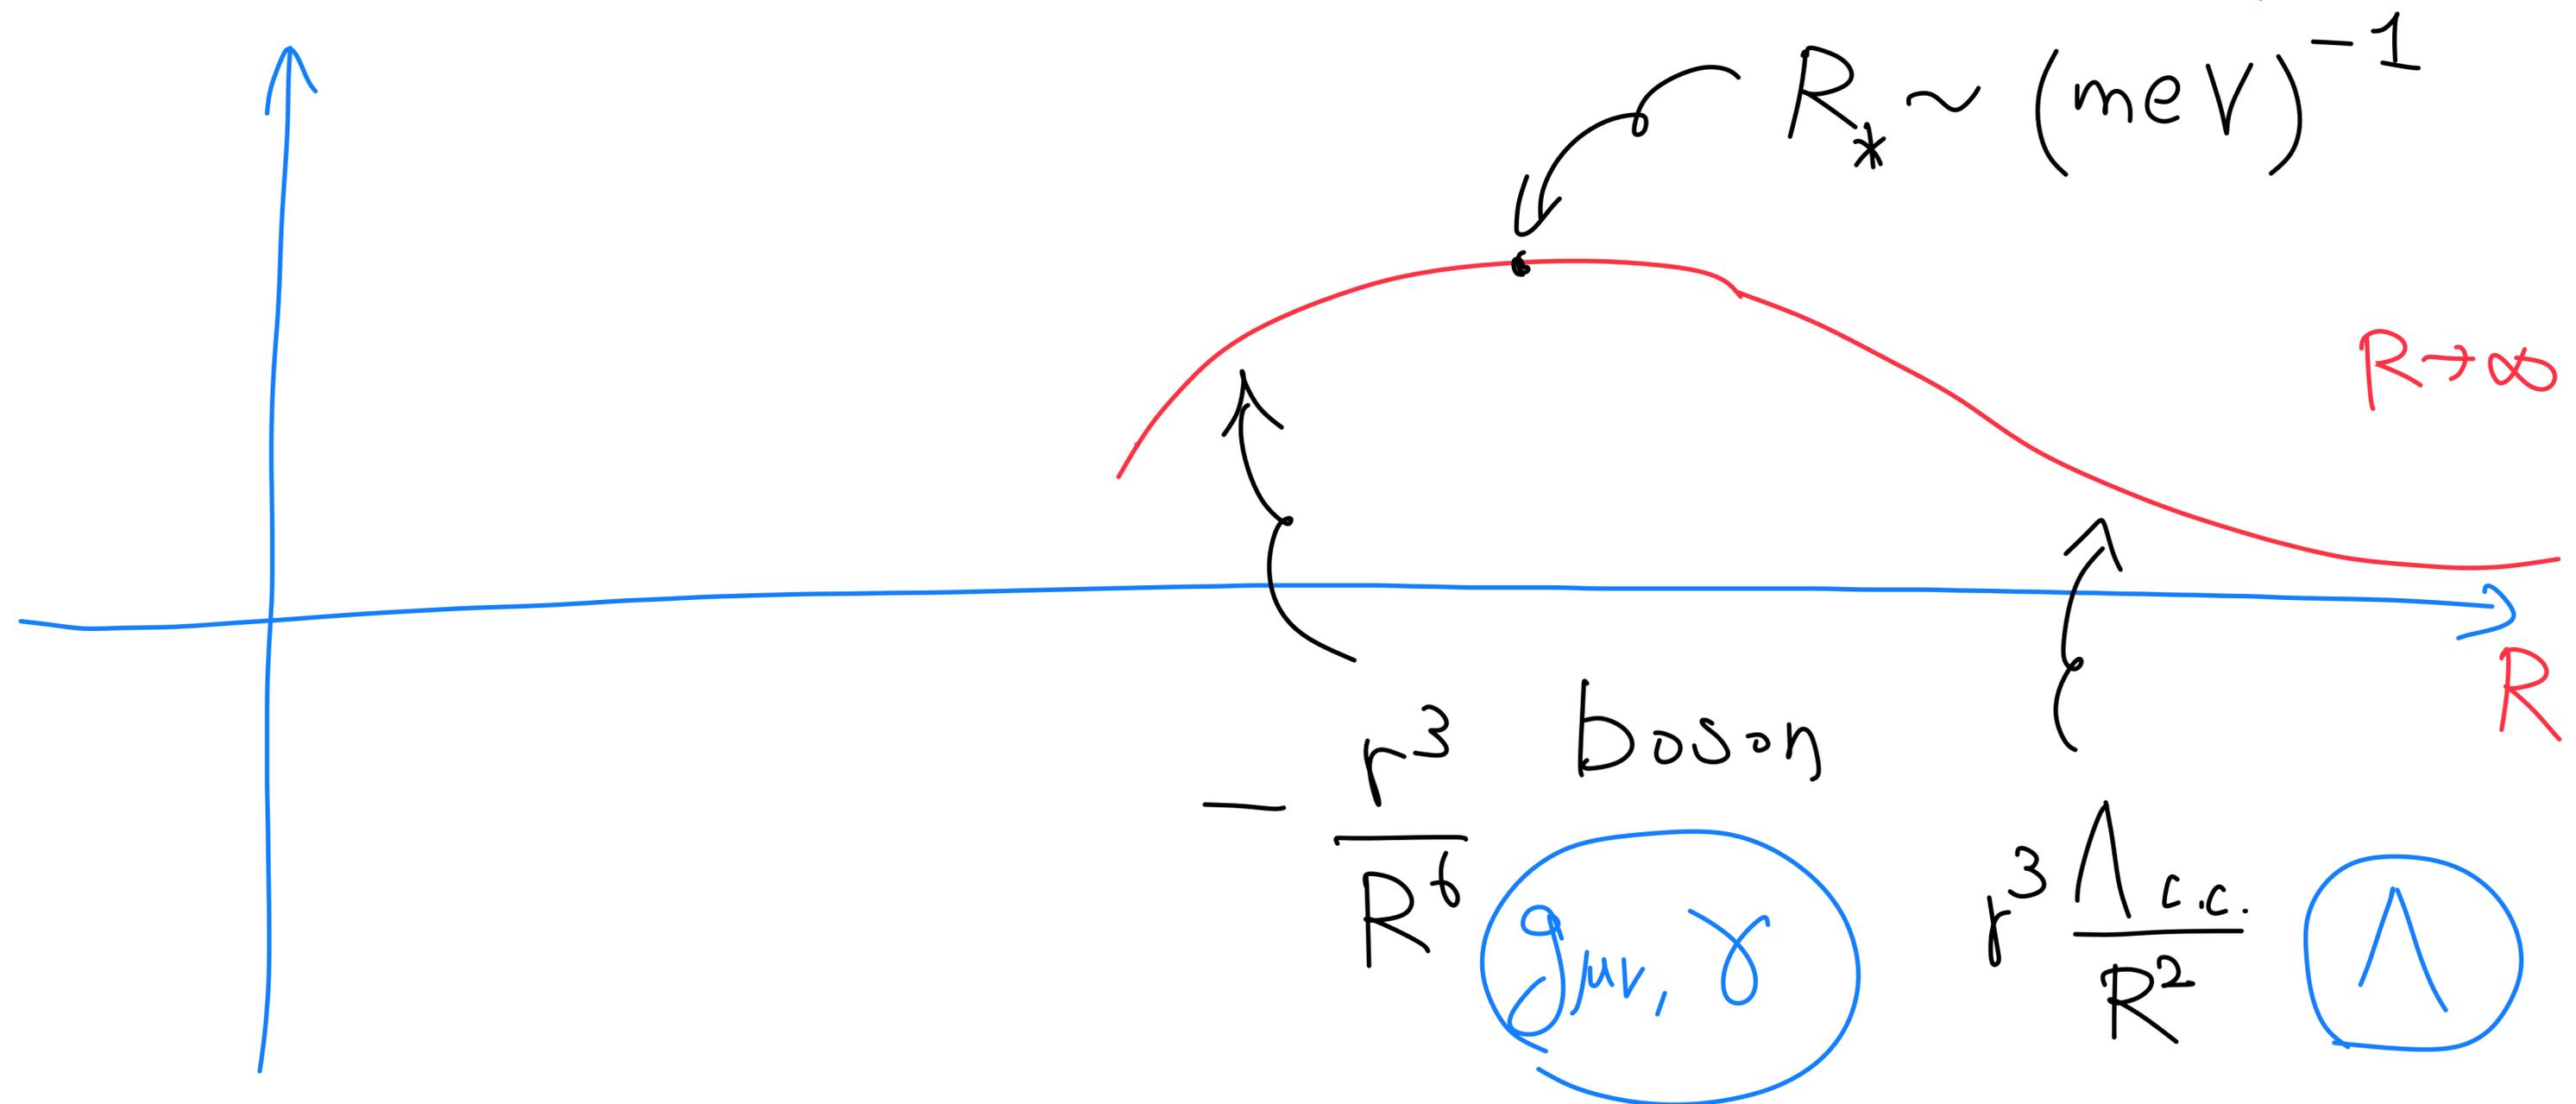

Consider SM on S^1 with radius R :

non-trivial potential from Casimir energy

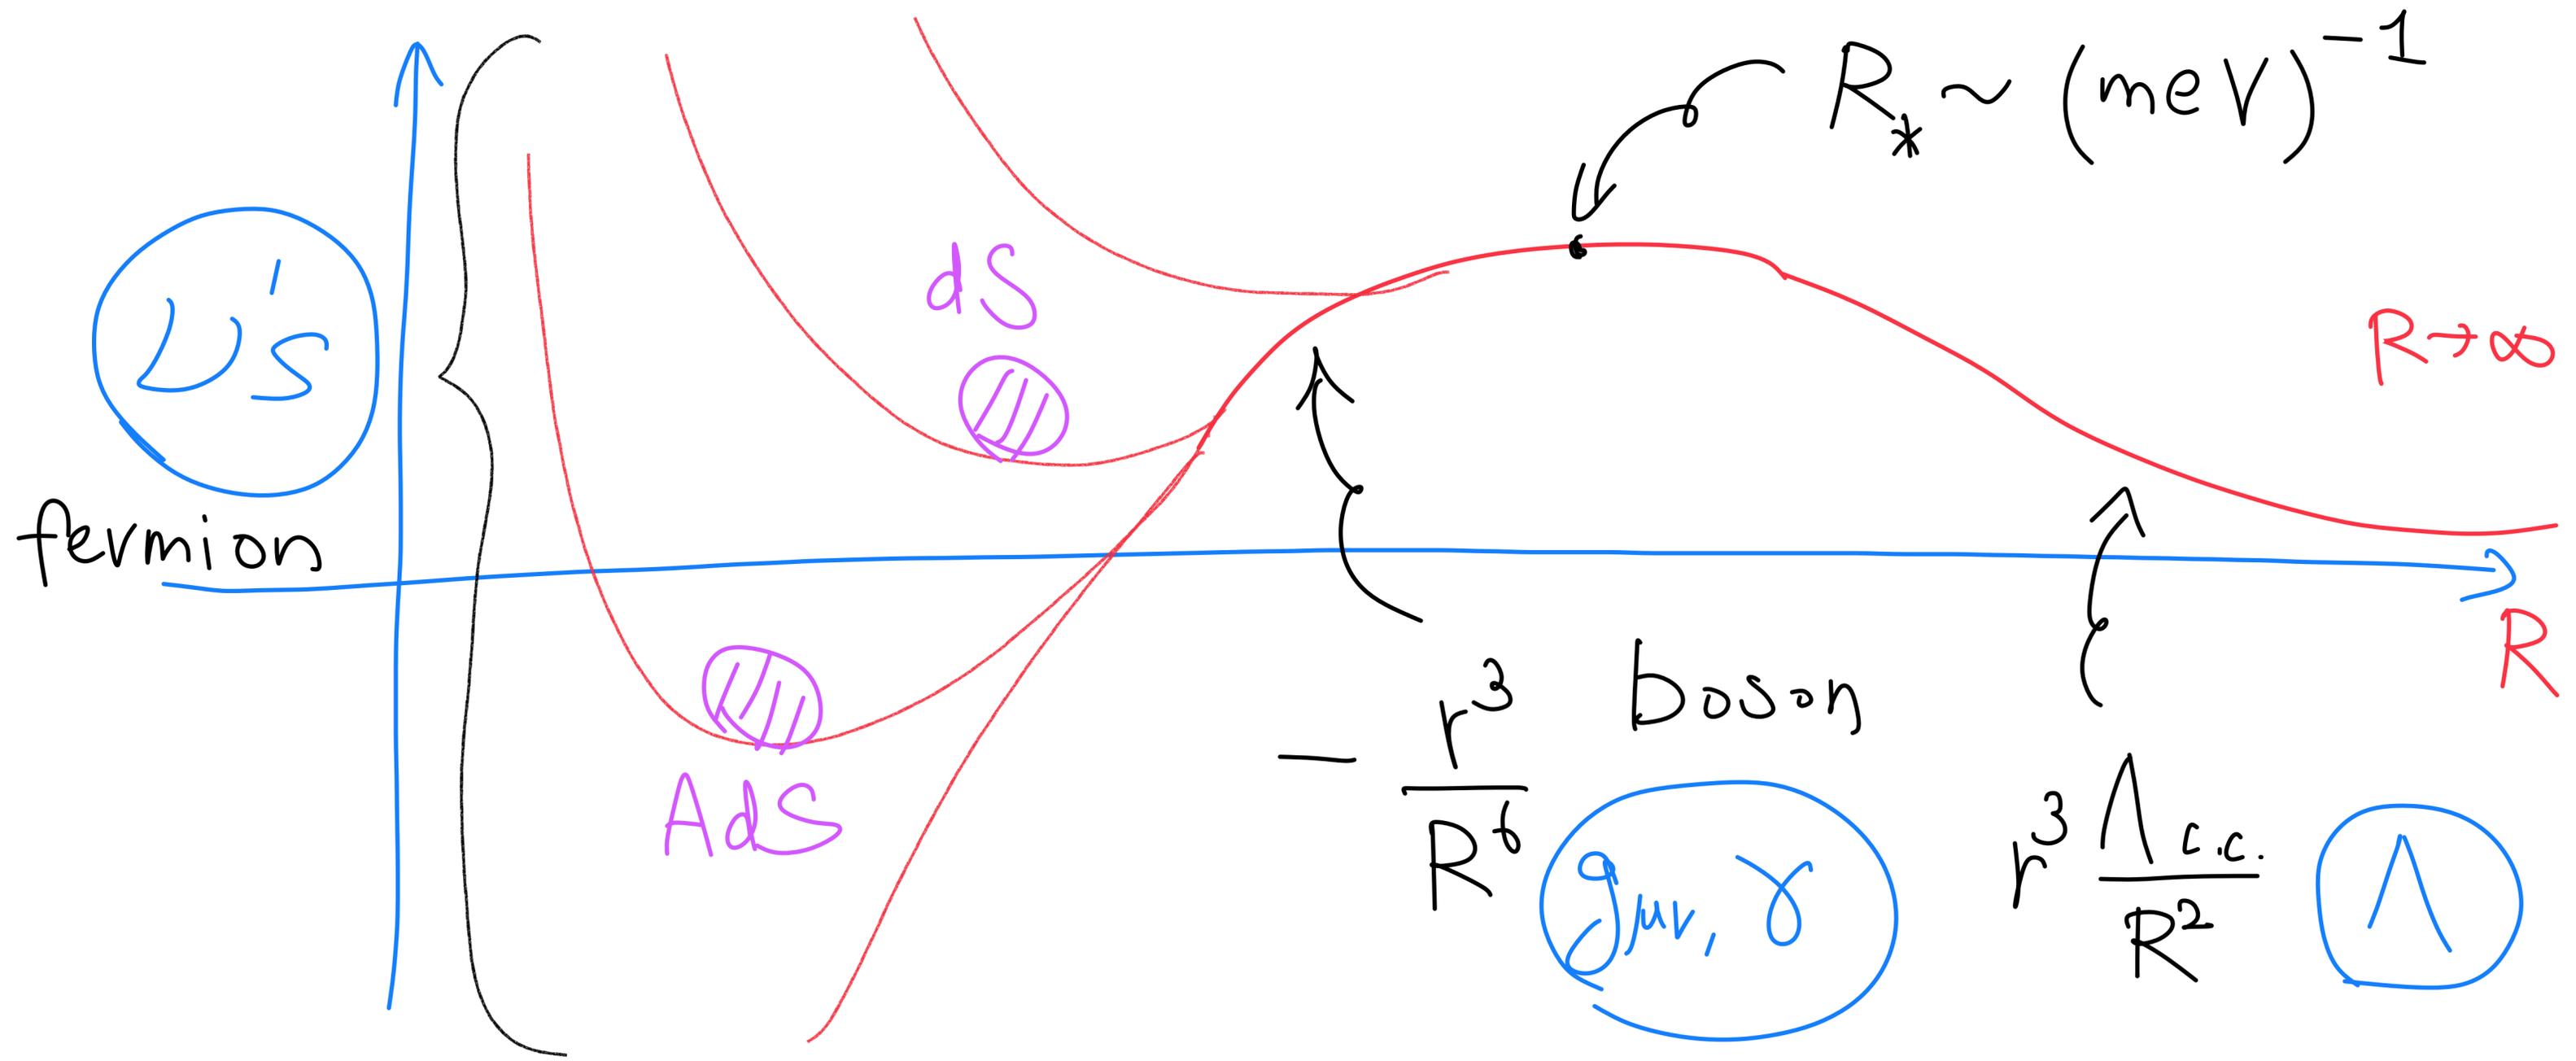

Consider SM on S^1 with radius R :

non-trivial potential from Casimir energy

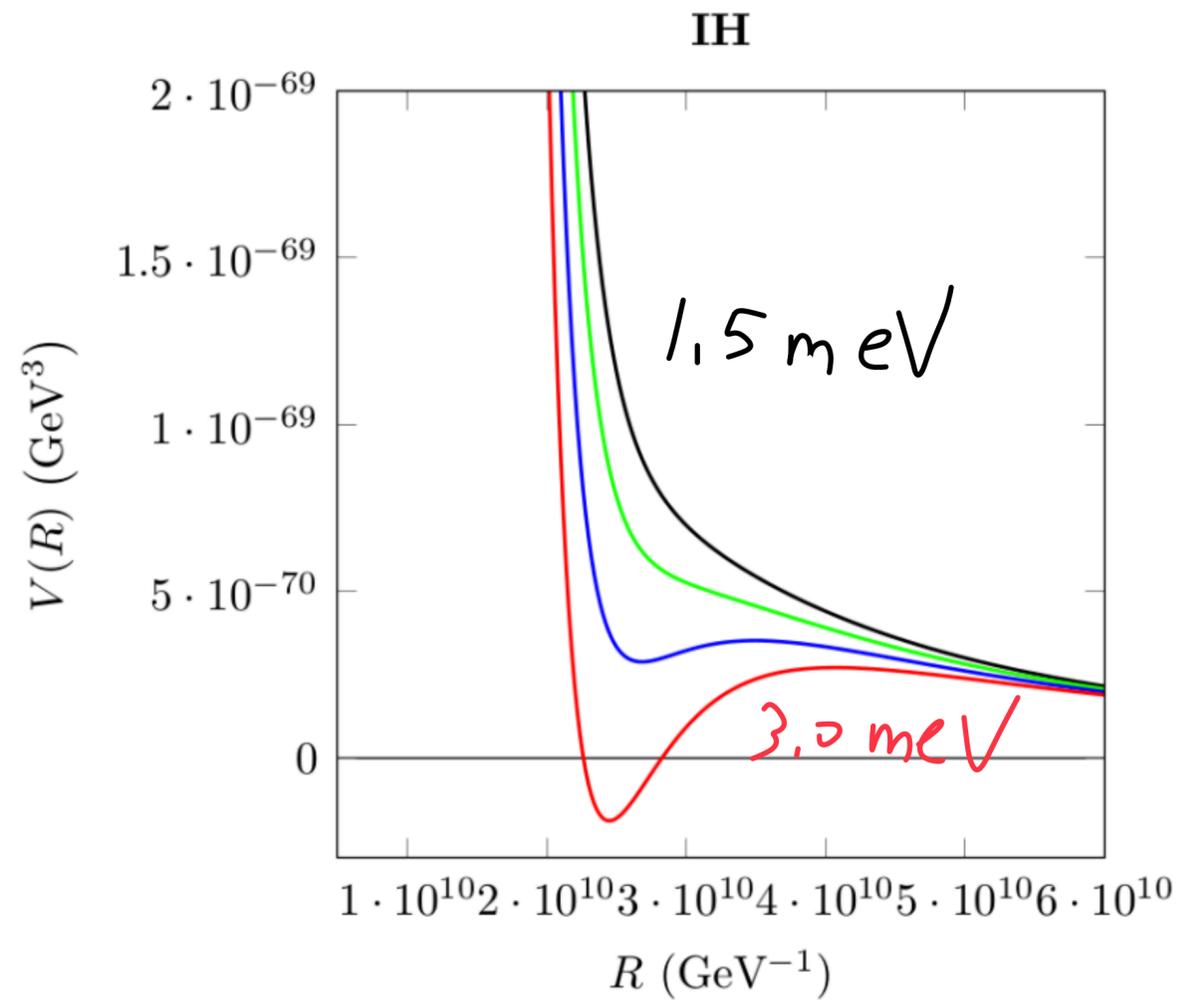

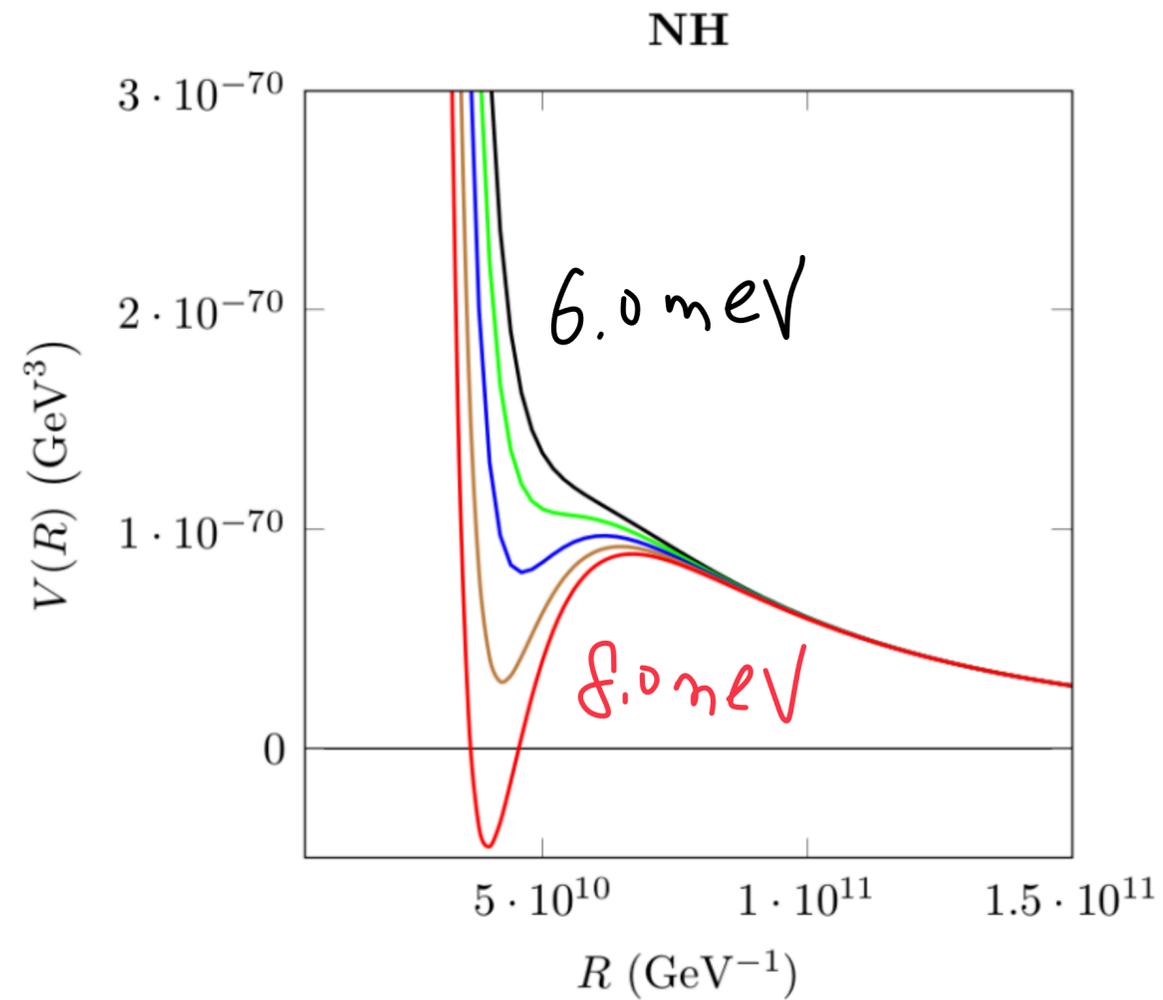

consider SM on S^1 with radius R :

non-trivial potential from Casimir energy

Dirac neutrino

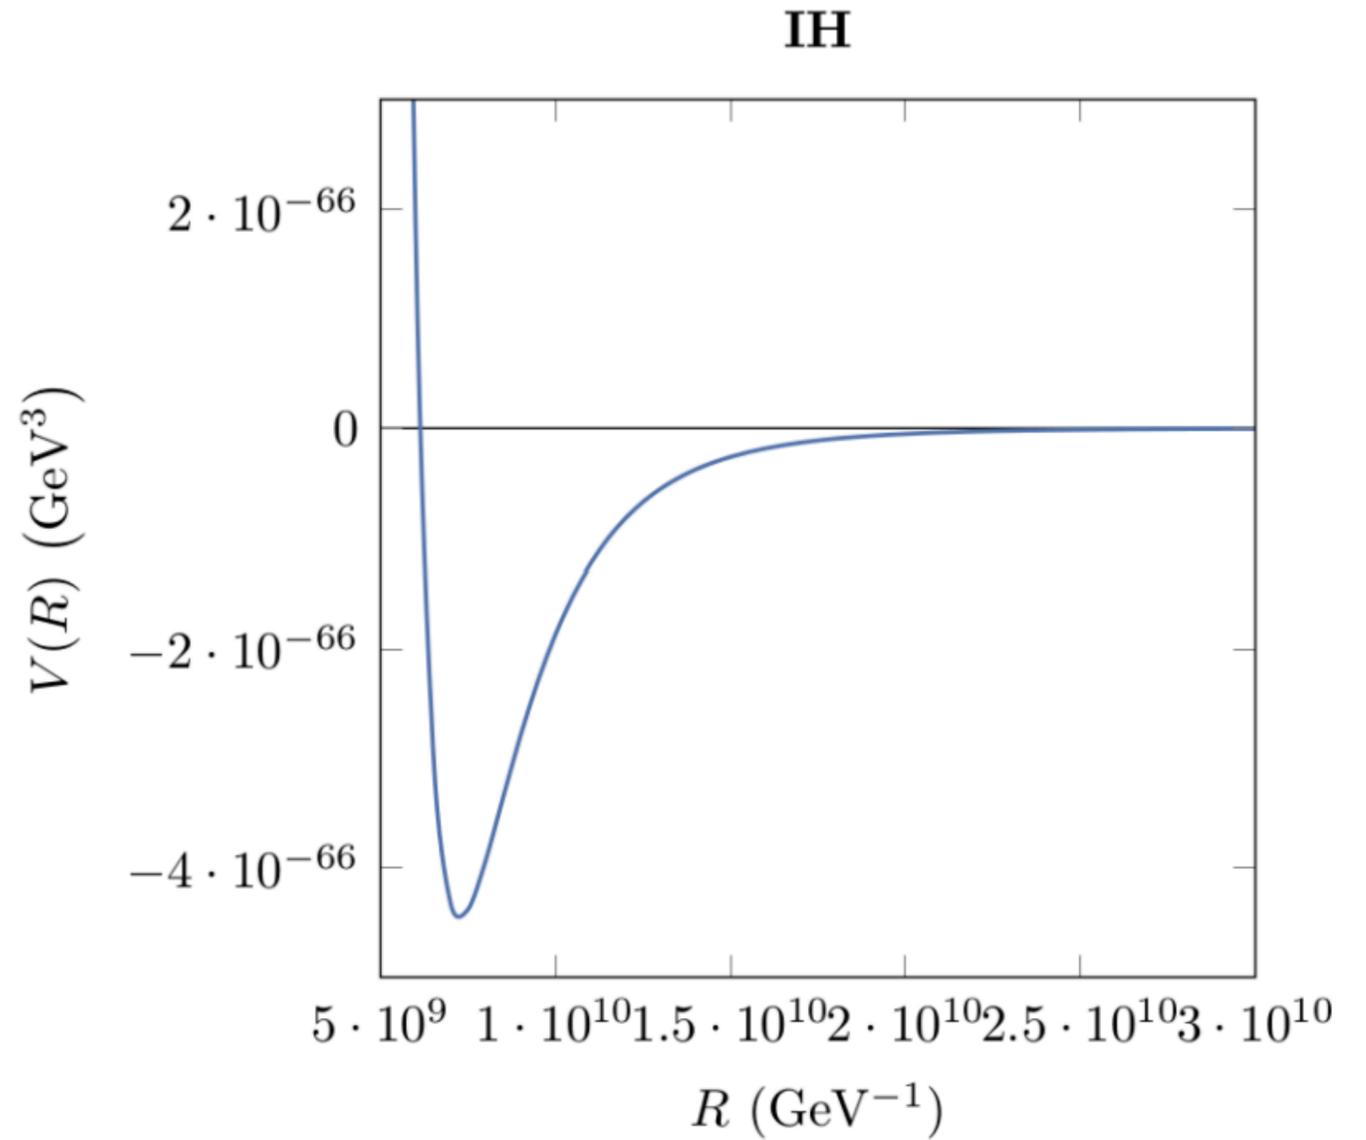

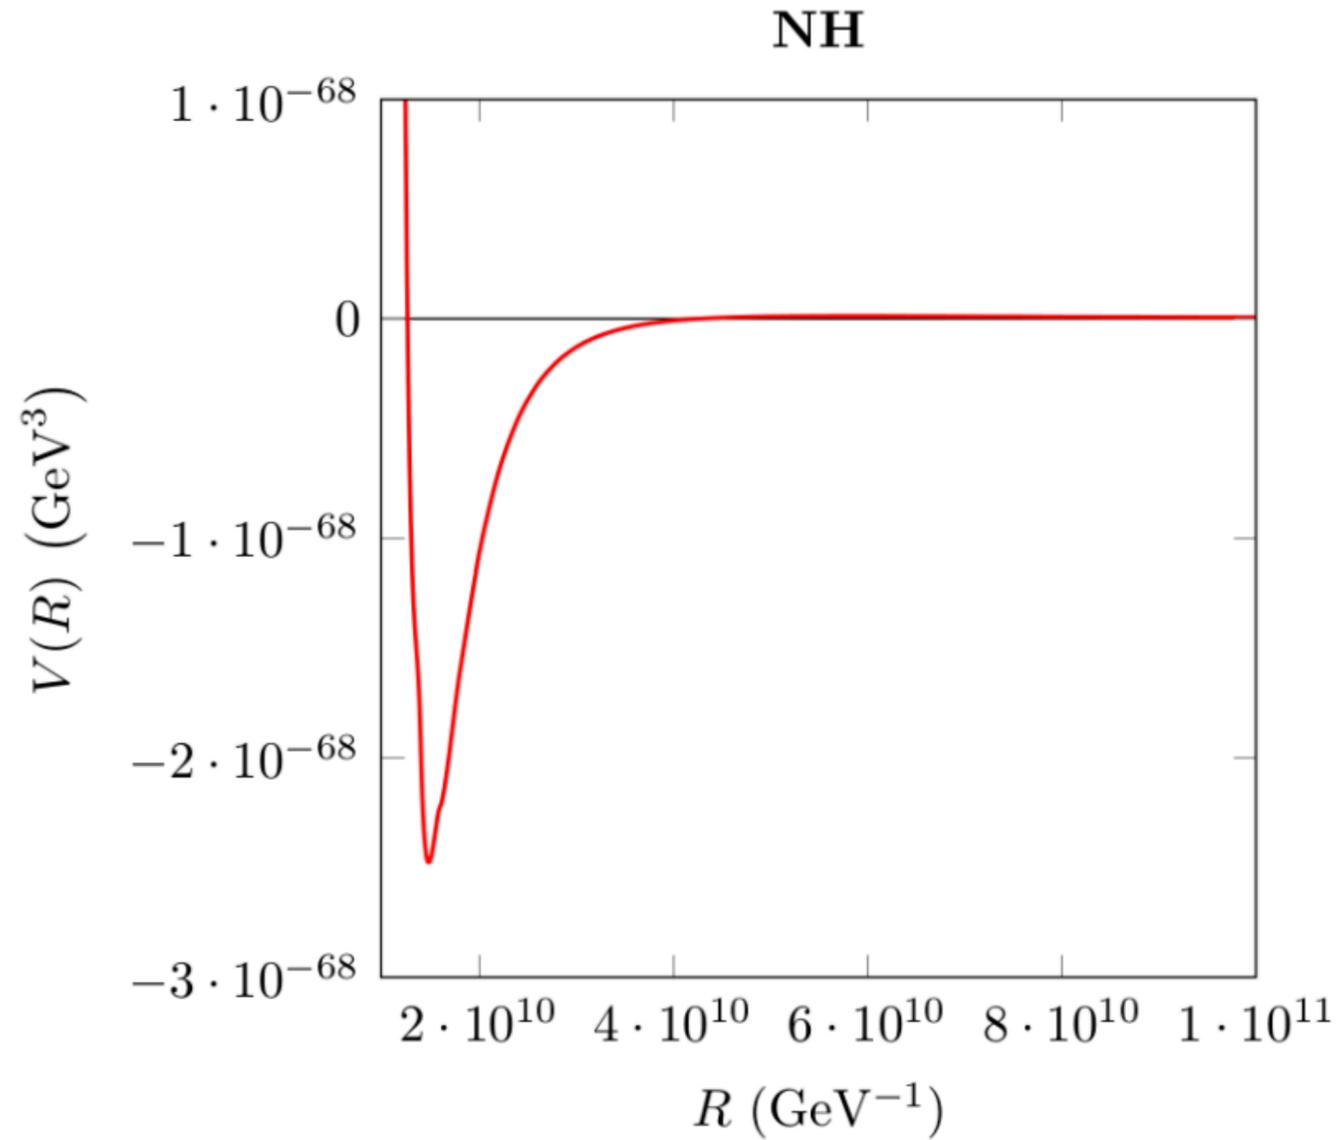

[Ibanez, Muñín-Lozano, Valenzuela '17]

	NH	IH
No vacuum	$m_{\nu_1} < 6.7$ meV	$m_{\nu_3} < 2.1$ meV
dS ₃ vacuum	6.7 meV $< m_{\nu_1} < 7.7$ meV	2.1 meV $< m_{\nu_3} < 2.56$ meV
AdS ₃ vacuum	$m_{\nu_1} > 7.7$ meV	$m_{\nu_3} > 2.56$ meV

Majorana neutrino

[Ibanez, Martín-Lozano, Valenzuela '17]

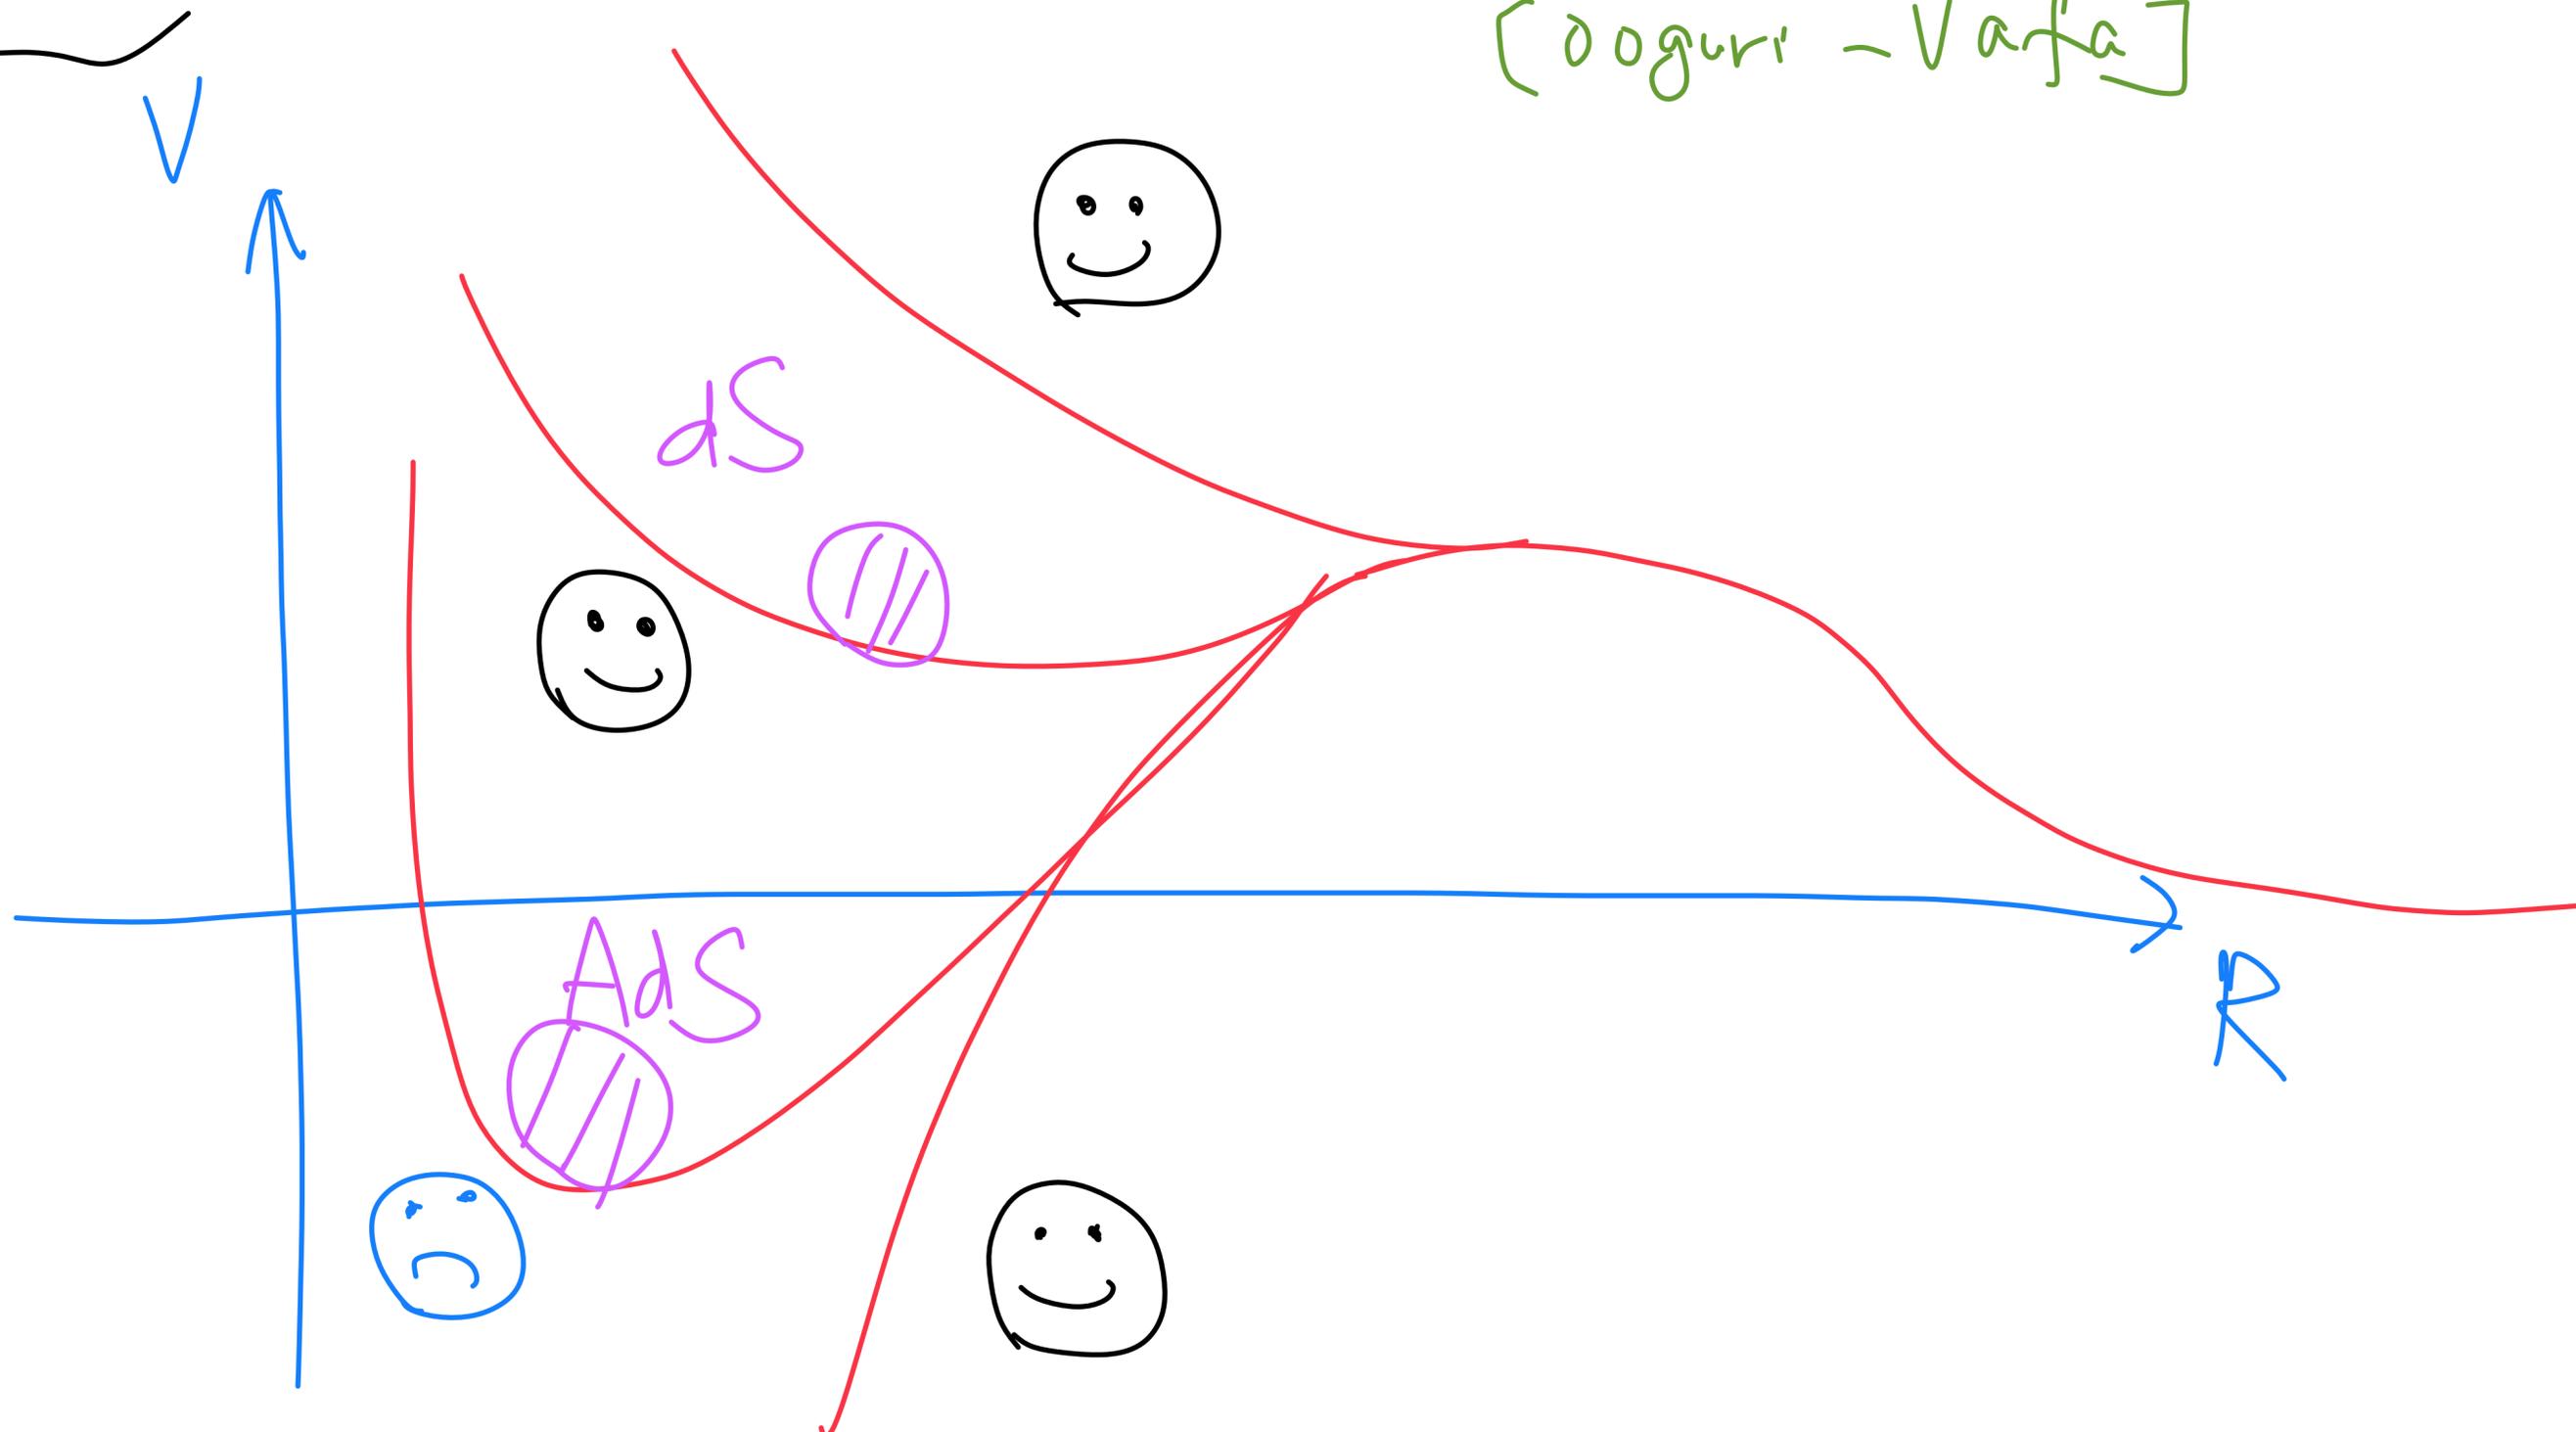

SwampLand?

Option 1:

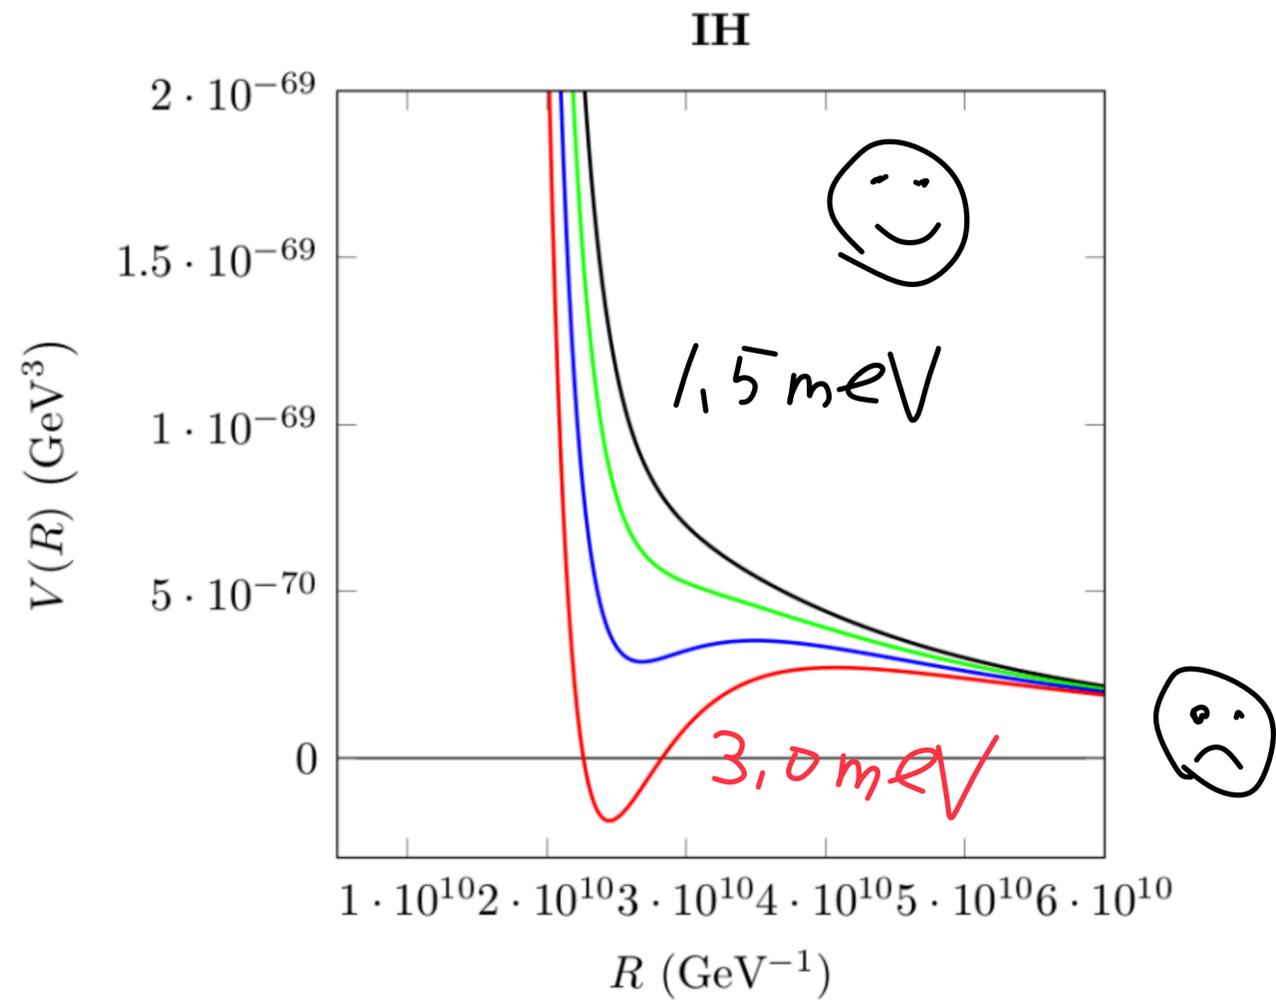

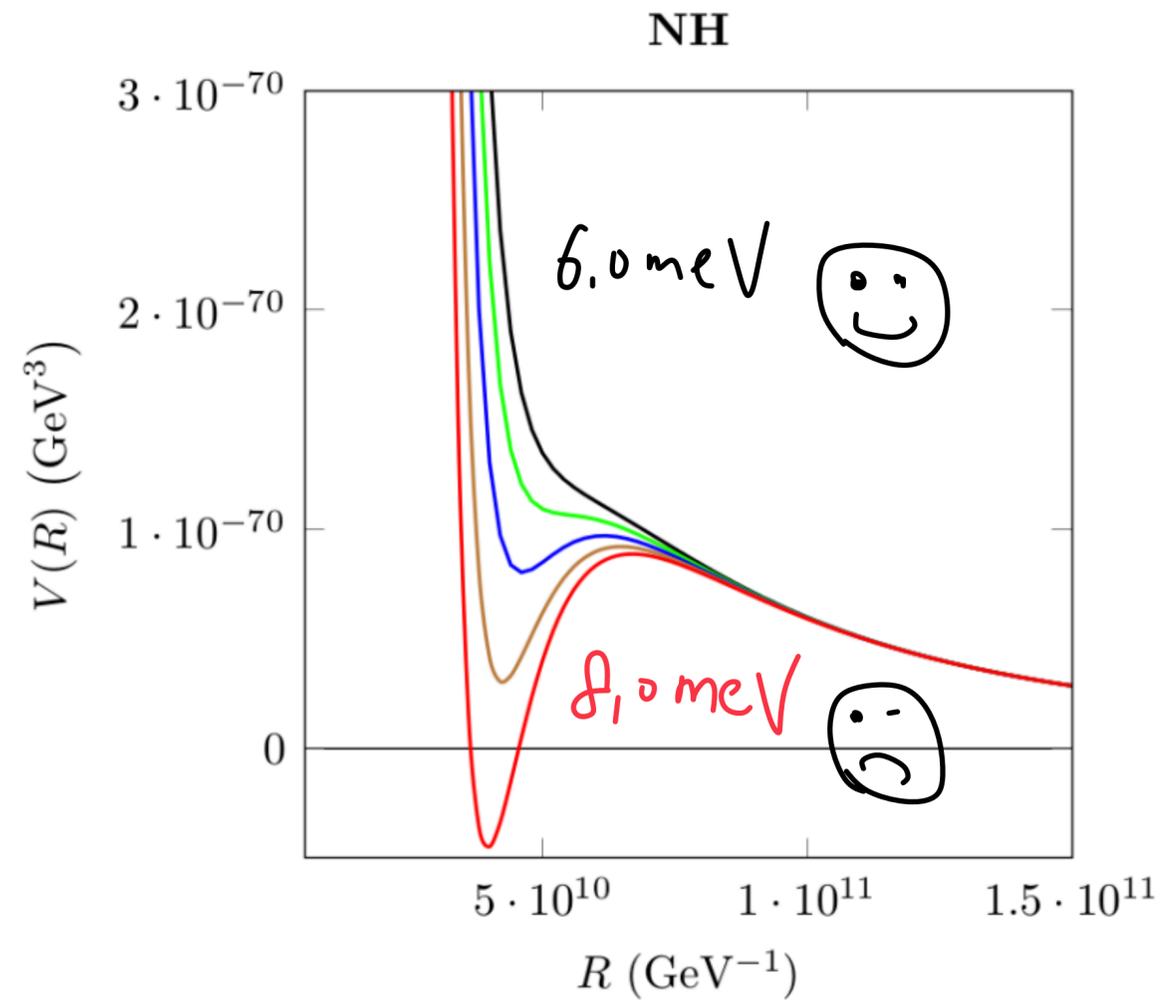

"No Non-SUSY AdS"

[Doolittle - Vafa]

Dirac neutrino

[Ibanez, Muñín-Lozano, Valenzuela '17]

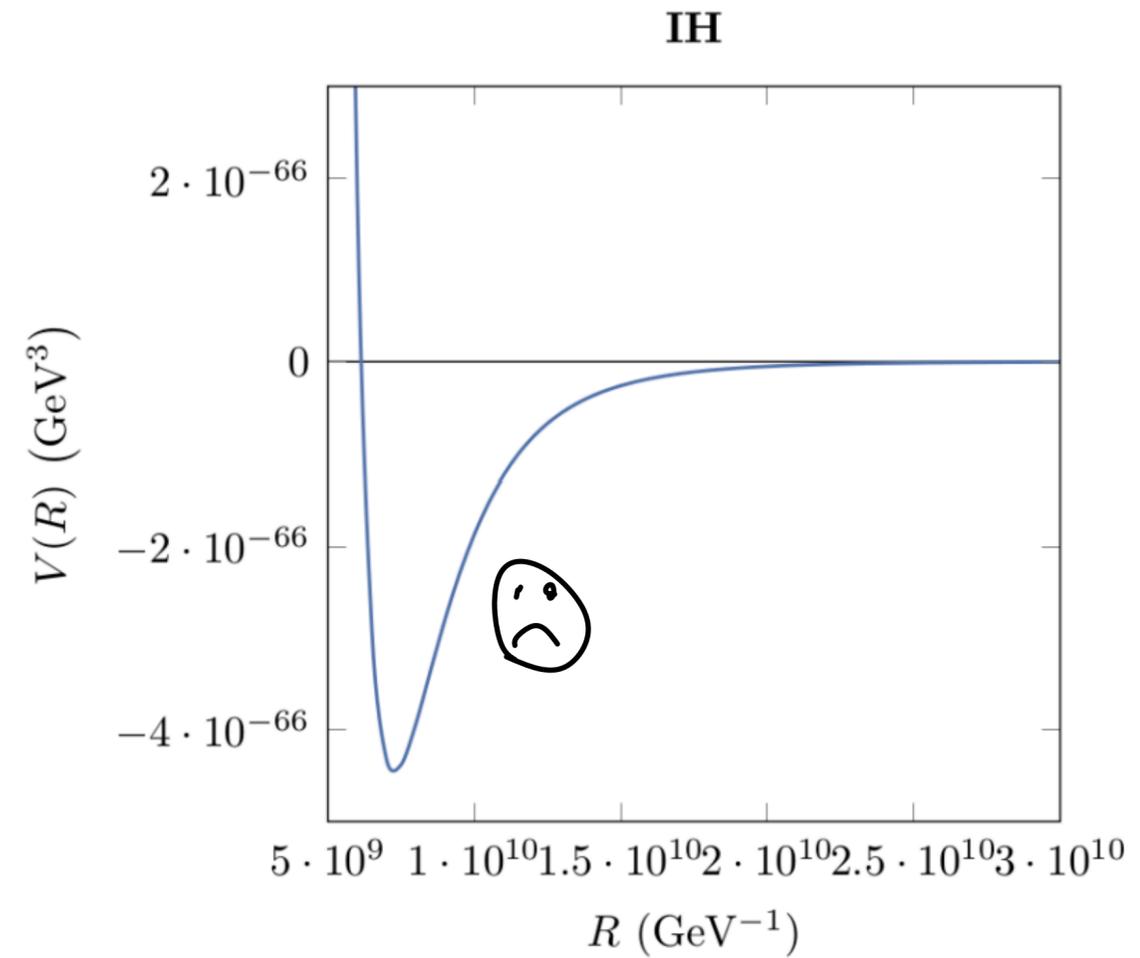

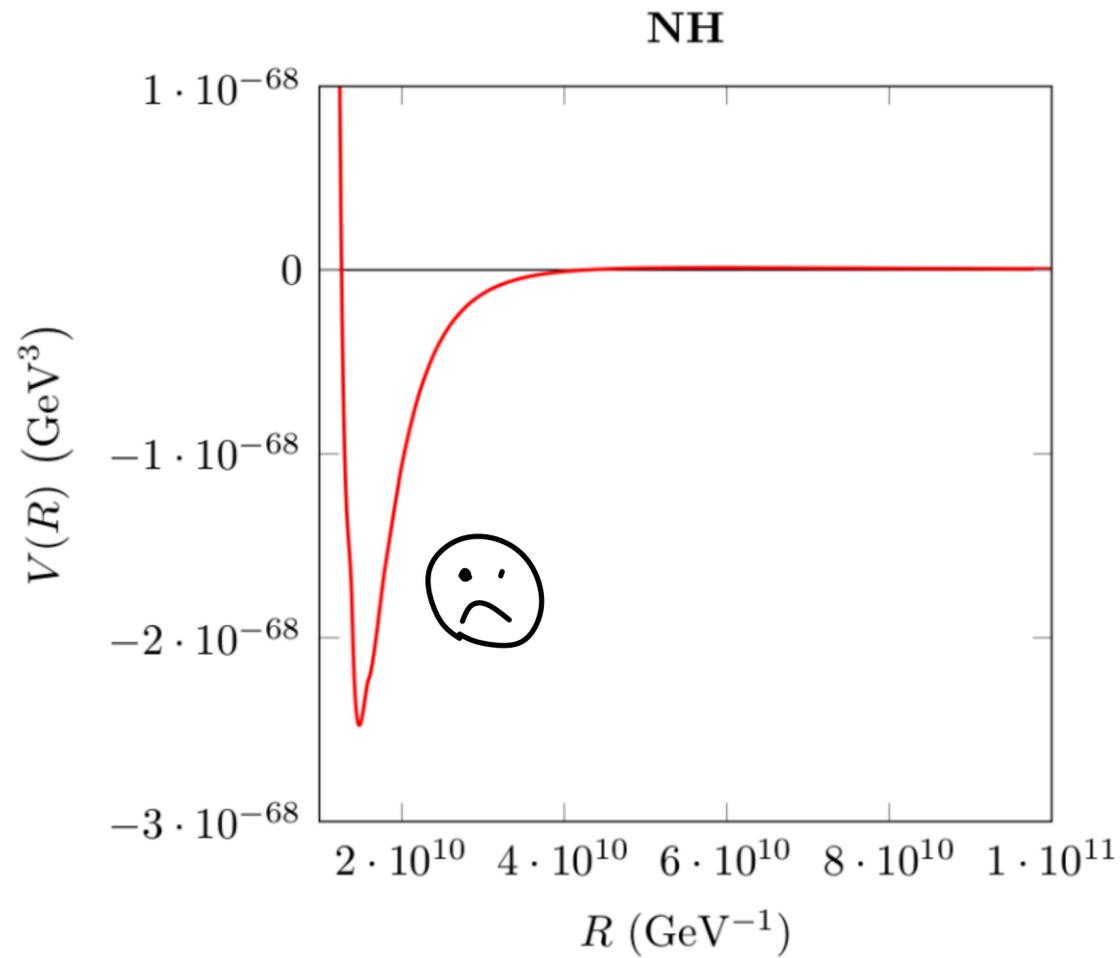

"Excluded"

	NH	IH
No vacuum	$m_{\nu_1} < 6.7$ meV	$m_{\nu_3} < 2.1$ meV
dS ₃ vacuum	6.7 meV $< m_{\nu_1} < 7.7$ meV	2.1 meV $< m_{\nu_3} < 2.56$ meV
AdS ₃ vacuum	$m_{\nu_1} > 7.7$ meV	$m_{\nu_3} > 2.56$ meV

Majorana neutrino

[Ibanez, Muñín-Lozano, Valenzuela '17]

"excluded"

Majorana neutrino

Simple reason:

☹ boson ($g_{\mu\nu}, \gamma$) DOF 4 < fermion DOF 6

Majorana neutrino

Simple reason:

☹ boson ($g_{\mu\nu}, \gamma$) DOF 4 < fermion DOF 6

☺ if we have ≥ 2 axions !!

Majorana \Rightarrow 2 axions !!

Option 2: "dS conjecture"

[Lüst-Palti-Vafa]

$$|\nabla V| \geq c |V|$$

[Obied-Ooguri-Spodyneiko-Vafa]

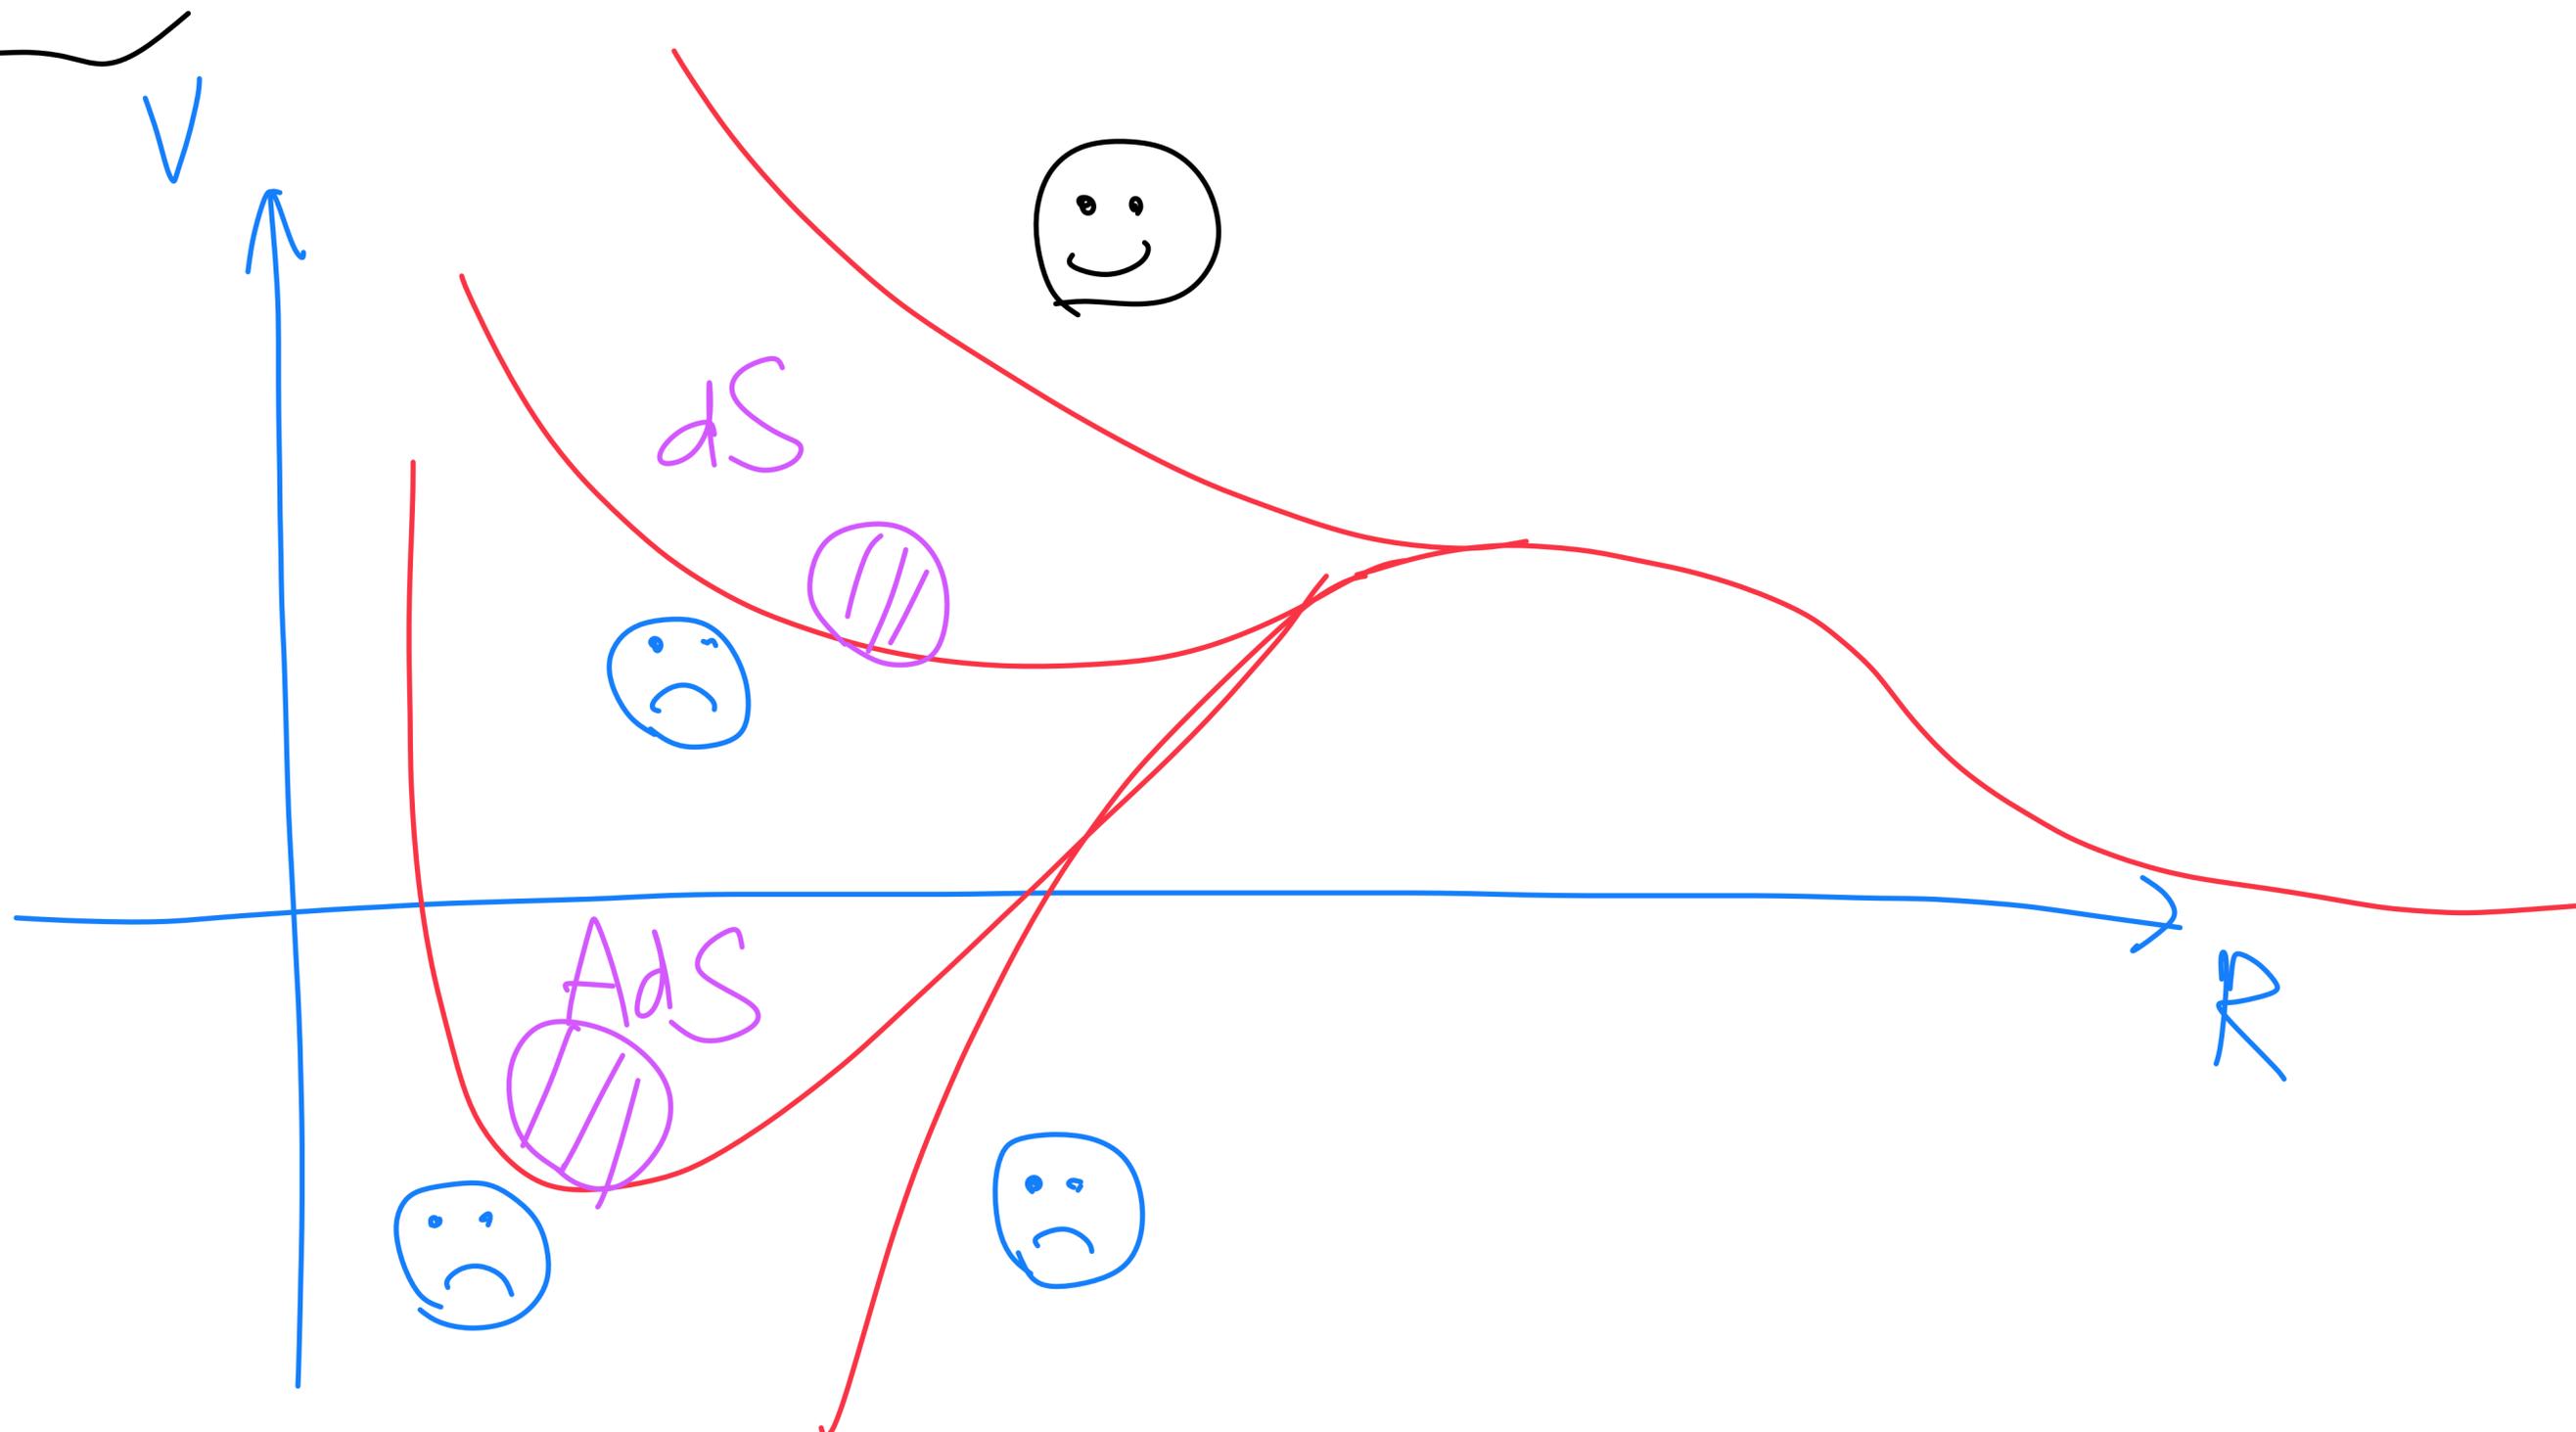

(cf. $|\nabla V| \geq c V$)

$\mathcal{O}(1)$ number

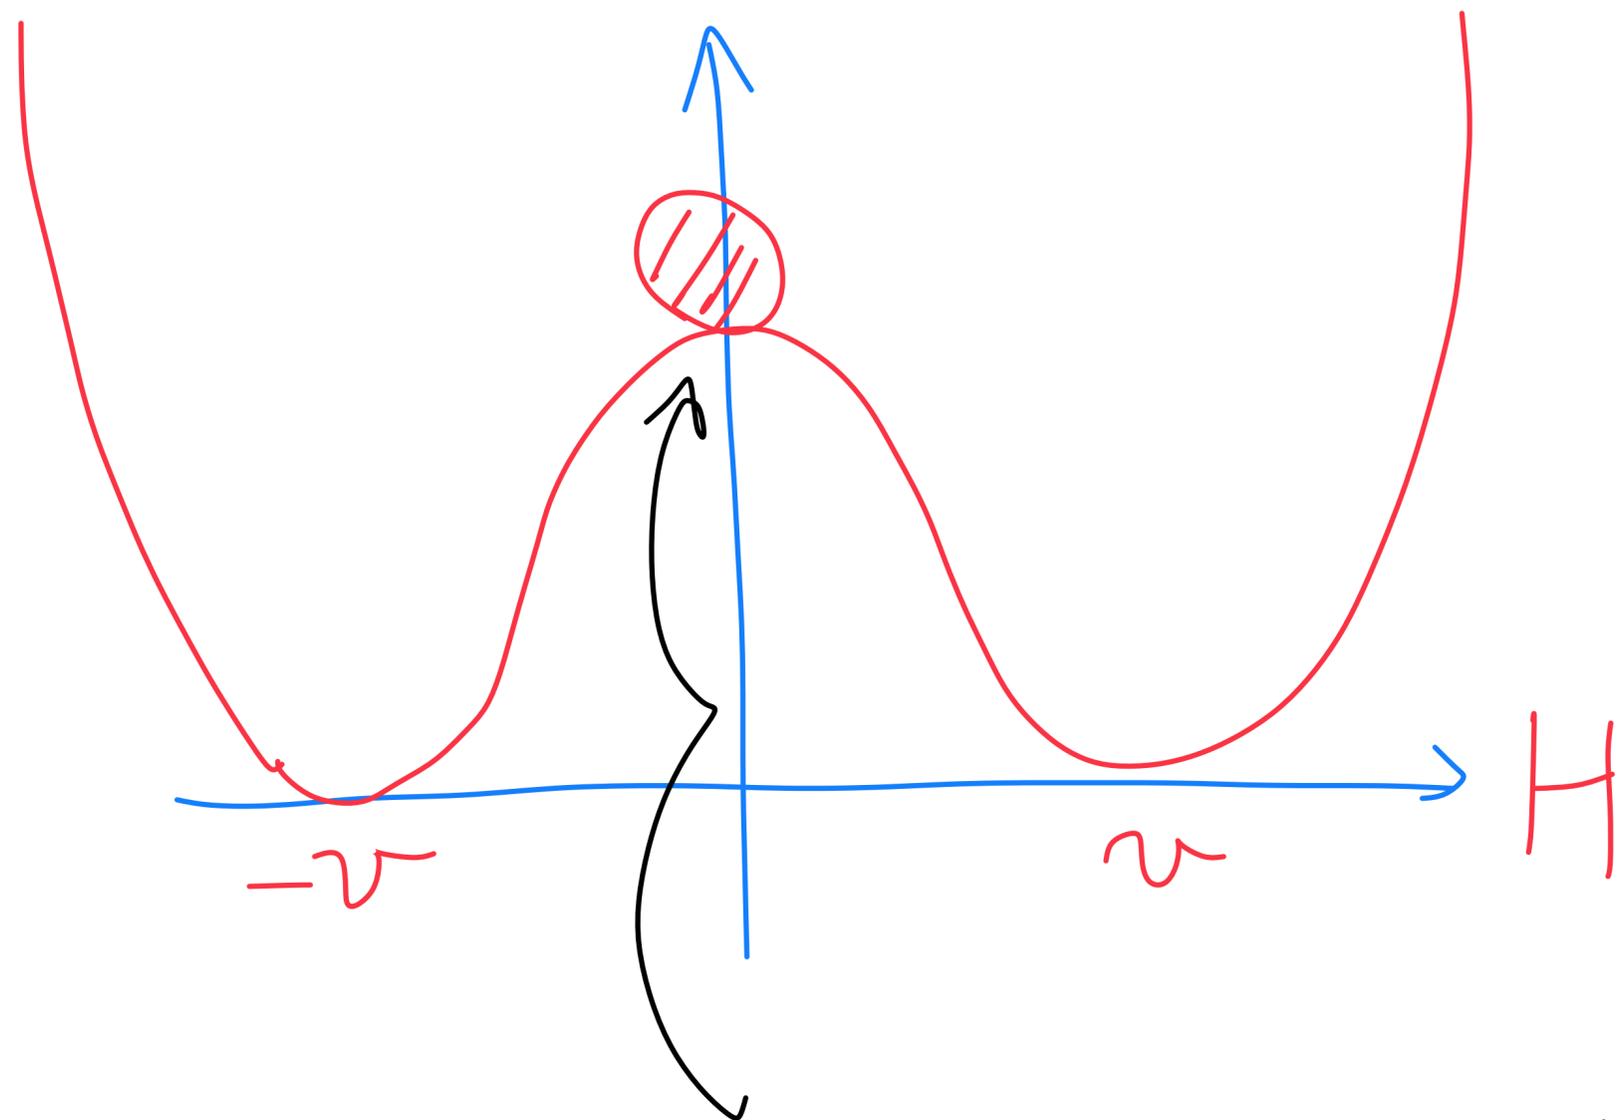

~~*~~ excludes

$$\nabla V = 0, \quad V \neq 0$$

Option 2: "dS conjecture"

* These conjecture: almost excluded already

$$V_{\text{Higgs}} = (|H|^2 - v^2)^2$$

[Denef-Hebecker-Wrase]

[Murayama-Tanigida
-MY]

local maximum $\nabla V = 0, V > 0$

Option 2'

Way out?

"refinement"

[Muroyama - Yanagida - MTS]

$$|\nabla V| \geq c V \quad \text{or} \quad \min(\nabla_i \nabla_j V) \leq 0$$

\nearrow
 \searrow
 $\Theta(u)$

$$|\nabla V| \geq c' V \quad \text{or} \quad \min(\nabla_i \nabla_j V) \leq -c' V$$

[Garg - Krishnan
Ooguri - Shiu - Palti - Vafa]

$$\nearrow$$

$\Theta(u)$

Summary

Landscape of SM on S^1

\rightsquigarrow AdS, dS vacua

\nwarrow conjecturally forbidden in QG

interplay of

- multiple ultralight axions
- neutrinos (Dirac / Majorana / NH / IH)
